TO NOMINATE 24 ELECTORS

Ohio Republicans Also to Adopt
State Platform.

MEET AT COLUMBUS TUESDAY

Senators Willis and Fess and Other Leaders to Address the Delegates. Charles Dawes, Republican Candidate For Vice President, Invited to Attend -- Preliminary Resolution May Be Reconsidered.

Columbus, June 21.--Adoption of a state platform and nomination of 24 candidates for presidential electors will constitute the chief business of the Ohio Republican convention which meets here Tuesday.

Gilbert Bettman of Cincinnati will be temporary chairman of the convention.

The resolutions committee is expected to go into session immediately after the convention meets, and will have the platform ready to be reported out and acted upon by Wednesday morning. The platform is to be a conservative document based upon the national platform adopted last week at Cleveland, but it will doubtless contain pertinent references to the administration of Governor Donahay.

Formal sessions of the convention open at 4 p. m. Tuesday in Memorial hall. Caucuses of the district delegations to choose their candidates for electors and select their representatives on the various convention committees are called for 2 o'clock that same afternoon. A permanent chairman will be nominated by the state central committee.

Efforts is being made to bring General Charles G. Dawes, Republican nominee for vice president, here to address the convention. Senators Willis and Fess are expected and will probably speak. Because of their number, the candidates for nomination for state office are not to be scheduled for speeches.

Former State Senator Asher A. Galbreath of Columbiana county, candidate for Republican nomination for lieutenant governor, announced he would make an effort at the convention to have the delegates rescind the resolution adopted by the recent pre-primary convention endorsing pre-primary nominating conventions and urging legislation to give such conventions a legal status in Ohio. Galbreath, who is a delegate to the state convention, was a delegate to the pre-primary convention and voted against the pre-primary resolution at that time. In the coming session he will present and attempt to secure the adoption of the following resolution: "Resolved, that the resolution adopted at the Republican pre-primary convention, relative to the pre-primary endorsement of candidates for state offices, be and the same is hereby rescinded."

The number of candidates for lieutenant governor was reduced from 19 to 17 when Thomas W. Latham, Democrat of Monroeville, withdrew and Evan S. Watkins, Republican of Cleveland, was ruled out by Secretary of State Brown, because his nominating petition was defective. Signatures of signers of his petitions were not sworn to. Withdrawal of Latham leaves four Democrats in the field for the nomination and the ruling out of Watkins leaves 13 Republicans in the race.

KLAN PARADE PLANNED

Donahay Instructs Mayor of Niles to Preserve Order.

Niles, O., June 21.--Mayor H. C. Kistler of this city was advised by Governor Donahay to have plenty of police on duty to avert possible disorder during a Klan parade scheduled for tonight here, but also to remember that all persons have the right of peaceful assembly. The governor's letter followed a visit to Columbus by a committee of Niles citizens who told the governor that disorder was feared in connection with the parade. The executive's letter asked the mayor to take every precaution against disorder or disturbance. A fiery cross was erected last night across from the McKinley memorial here, but was destroyed at once by a bomb thrown by unknown persons.

Residence Ransacked.
Pikeville, Ky., June 21.--When Congressman John W. Langley returned from Washington he found his house had been ransacked by persons evidently seeking documents.

CORDELL HULL

Chairman of the Democratic National Committee.

BONUS BLANKS OUT

Distribution Begins Today in All Parts of the Country.

Washington, June 21.--Adjutant General Davis announced that distribution of 6,000,000 soldier bonus blanks began all over the country today. American Legion posts, Red Cross chapters, local organizations of veterans of foreign wars and disabled American veterans and the army, navy and marine corps will see that every former service man gets one. Mail trains have been carrying huge cargoes of blanks from Washington since Monday and their movement, as a result, is practically keeping pace with the printing presses. Shipments have been made according to geographic priority in order that states far from the capital may receive their blanks at the same time as those on the Atlantic coast.

Blind Solon Wins.

St. Paul, June 21.--Representative Thomas D. Schall, blind Minneapolis congressman, is apparently the Republican nominee for United States senator to oppose Magnus Johnson and John J. Farrell for election.

Policeman in Crash.

Columbus, June 21.--Policeman C. R. Will was injured seriously as the result of a collision between his motorcycle and an automobile driven by a woman.

SMITH CLAIMS NOMINATION

New York Governor Says He'll
Be Convention's Choice.

McADOO FORCES CONFIDENT

Former Secretary of Treasury to Lead the Field in the Early Ballot. Ohio Delegation Rated as Opposed to McAdoo to the Last Ditch. Dark Horses Open Headquarters in the Metropolis.

New York, June 21.--Despite the prediction that William G. McAdoo, one of the leading candidates for the Democratic nomination for president, can not command more than 450 votes at any time, the forces opposed to the former secretary of the treasury are beginning to fear that the claims of the McAdoo managers are based on a firmer foundation than was at first believed.

Even the most ardent supporters of Governor Al Smith concede that Smith will be unable to muster more than 300 votes. Smith today made his first direct statement that he would be nominated. Franklin Roosevelt, who has been directing the organization work here, has retired to his home, there to prepare the speech he will make in nominating Smith. Smith said this was possible because work was so well in hand and "I certainly will be nominated."

John W. Davis was brought into prominence by the publication of his letter, saying in effect that he was not a candidate, but would answer a call. He was the subject of conversation along with Carter Glass, Senator Hailston of Indiana and others, but hardly enough delegates have arrived to justify a statement that one "dark horse" showed more strength than another.

Party chieftains admittedly against McAdoo, and neutral regarding Smith, immediately began sounding out state leaders on Davis as a possible compromise candidate in the event that the Smith-McAdoo contest developed a deadlock.

Insofar as actual strength is concerned, at present McAdoo and Smith have it all, and one or the other of these candidates must be killed off in balloting before any marked stable shift to other quarters may be expected.

The Ohio delegates are pledged to James M. Cox and are rated as opposed to McAdoo to the last ditch. As the situation develops there is increasing likelihood of a "dark horse" being nominated. Leaders say that the ultimate choice lies outside either McAdoo or Smith.

McAdoo is at the Vanderbilt, where he occupies an entire floor. He is alone in this famous hotel. The headquarters of every other candidate is located at the Waldorf.

Managers of George S. Silzer, governor of New Jersey; Carter Glass of Virginia, Oscar Underwood of Alabama, and James M. Cox of Ohio have opened headquarters here.

Work already has been started by Homer S. Cummings of Connecticut on the party platform.

ASKS FOR \$75,000

Woman Charges She Was Taken
From Home and Whipped.

New Orleans, June 21.--Suit has been filed at Alexandria, La., by Mrs. Lillian Bonnett against Mrs. Gertrude Ball, Mrs. Anetta Jordan and Mrs. Lessie Hatchett, whom she named as her alleged assailants. Mrs. Bonnett asks for \$75,000 damages, charging she was taken from her home by three women and horse-whipped. The woman declared in her petition that on the night of April 25 she was in her home clothed in a kimono and bedroom slippers, recovering from an operation, when the three women entered her house, beat her and pulled her hair, "hog-tied" her, searched her house, taking a revolver, necklace and fur, then put her in an automobile and took her into the woods, where she was beaten and tortured like a dog. Mrs. Bonnett is the mother of a boy of seven and a girl of nine years old and lives with her husband four miles from Alexandria.

Ball Players Fined.

Chicago, June 21.--Ban B. Johnson, president of the American league, announced the following punishment for the players who participated in the row between the New York and Detroit teams in Detroit last week: Fine of \$100 and 10 days' suspension for Bob Meusel, New York; \$50 fine for Babe Ruth, New York; \$50 fine and 10 days' suspension for Pitcher Cole of Detroit.

GOVERNOR AL SMITH

One of the Leading Candidates
For Democratic Standard-Bearer.

DOINGS IN OHIO

Building Collapsed.

Springfield, O., June 21.--Three persons were injured when a business building collapsed. The injured are: John C. H. Kiehl, Lancaster, Pa.; Harry Hayden, Cincinnati, and Miss Marie Burke. The building was occupied by the Tuttle Brothers' tire shop and adjoins a lot where excavation work for a new building is in progress.

Car Turns Over.

Toledo, June 21.--Grover C. Foot, 14, was killed when the auto in which he was riding turned over against a pole, when the driver attempted to avert a collision with another car, near Napoleon, this county. The car, driven by Warner Crosby, was forced from the road by another car.

Loan Company Robbed.

Cleveland, June 21.--A young woman, cashier of the Capital branch of the Atlas Savings and Loan company was held up by two armed robbers, bound to a chair in a private office and made to watch while the robbers took \$1,000 from the teller's drawer and escaped.

Destructive Hail Storm.

London, O., June 21.--A hail storm of Clark county was a rain and hail storm. The hail was small, but it was very heavy and killed, and garden crops destroyed and trees and small shrubbery suffered from the hail, in the vicinity of South Charleston.

Bankers Elect.

Cedar Point, O., June 21.--B. G. Huntington of Columbus was elected president of the Ohio Bankers' association in its annual convention here. Other officers elected are: William R. Green, Cleveland, vice president, and William Meyers, Canton, treasurer.

Jeweler Robbed.

Toledo, June 21.--Jewelry valued at \$35,000 was stolen from the room of George Demering in a hotel here, according to a police report. Demering is president of the Joseph Noerman company, wholesale jeweler of Cincinnati.

Doctor Wins Verdict.

Marysville, O., June 21.--The jury in the case of Walter Bishop, suing Dr. E. S. Holmes of Plain City for alleged malpractice in reducing a fractured leg, returned a verdict for Dr. Holmes.

Worker Electrocuted.

Canton, O., June 20.--Jose Bobo, 40, was electrocuted in the switch room of the Timken Roller Bearing company's plant here when he came in contact with a live wire.

Two Boys Drown.

East Liverpool, O., June 21.--Ronald Andrews and Richard Dover, both 11, were drowned while bathing in the Ohio river.

HERE AND THERE

Yale defeated Harvard in their annual boat race at New London, Conn., by three lengths.

Warren Lincoln, 45, lawyer, of Aurora, Ill., who confessed killing his wife, Lina, and her brother, Byron Snoup, and placing their bodies in a concrete block, will plead insanity.

Cyrus Woods, former ambassador to Japan, predicted the exclusion act would have a serious effect upon business relations between America and Japan.

FIRST BIG FIGHT OVER PLATFORM

Bryan and Others Insist Upon
Progressive Declaration.

WET AND KLAN ISSUES BOB UP

Contest Also Expected on the Question Whether the League of Nations Issue Shall Be Revived as a Counter Proposal to the Republican World Court--Klan Leader to Direct Fight Against Anti-Klan Plank.

New York, June 21.--Indications are that the first big fight in the approaching Democratic national convention will be staged before the resolutions committee on the question of the party's declaration of principles.

One of the problems confronting the delegates is whether the platform shall be called conservative or progressive. William Jennings Bryan is determined upon a progressive platform. Having a seat as a delegate from Florida, he may be expected to wield a big influence in the convention, especially in consideration of the wet and dry question.

Other questions are: Whether the platform shall be wet or dry, without reservation; whether it shall be definitely anti-klan, or straddle; whether the league of nations issue shall be revived as a counter proposal to the Republican world court plank, and what shall be said with respect to the farm situation and what counter proposals shall be made for relief.

Party leaders who have joined in agitating the klan issue more to make a little political medicine than anything else now are said to be somewhat disturbed lest it react unfavorably on certain candidates the leaders support and create great difficulty for the party. There is no doubt the klan question has been flung in the face of the McAdoo forces to help subdue, if possible, the confidence that prevails in the McAdoo headquarters.

George E. Brennan, Illinois leader, has become insistent for a plank in the platform denouncing the klan by name. The Underwood forces are adding fuel to the fire. And the report here that Imperial Wizard Evans of the klan is coming Monday to direct the fight against an anti-klan plank and endeavor to put over McAdoo, coupled with printed allegations that the klan supported McAdoo in various state primaries, has served to stir the Smith faction.

The anti-Smith crowd has been contending that, even if nominated, the New York governor could not be elected because the religious issue would be injected into the campaign.

From the beginning, Democratic leaders who have party success more at heart than the interests of any one candidate have sought in vain to put a quietus on the klan question. Democratic success in such states as Indiana and Ohio would be seriously jeopardized if the klan issue should bring about a party split.

OFFICERS HELD UP BY TWO YOUNGSTERS

Relieved of Money and Gems
in a Pullman Coach.

Parkersburg, W. Va., June 21.--Two boys are in jail here after they had succeeded in taking \$500 in cash and diamonds valued at \$2,000 away from a United States marshal and his deputy in a bold holdup on a Pullman car 20 miles east of here. After the robbery the boys jumped off the train and fled in the darkness.

Later a farmer drove into town with the boys who gave their names as "Compton" and "Chamberlain," 12 and 15 years of age respectively. They said their homes were in Tulsa, Okla. The farmer had heard of the robbery, became suspicious and drove direct to the county jail. He turned the two youthful bandits over to the sheriff. They admitted the robbery. "We were just traveling," the boys told authorities. "We ain't no common kids, we're hard."

Marshal James Easer and Deputy William Sineel were the victims of the holdup. The diamonds and half of the money were recovered. One of the boys flashed a revolver in perpetrating the robbery.

FAIR GROUNDS ENLARGED

Opening of Ohio Exposition Will Find
Number of New Buildings.

Columbus, June 21.--Opening of the Ohio state fair Aug. 24 will find a new cattle building, larger and better quarters for swine, an electric light and supply system for the northern quarter of the grounds, new entrances to the grounds, about 30 acres more of land on the east side and a number of new features with respect to beautification of the grounds, Charles V. Truax, director of agriculture, announced. The combined program has been planned at a cost of \$381,000, of which the cattle building will cost \$250,000, the swine building \$90,000, the electrical system \$31,000 and the entrances \$10,000. The new cattle building will be the largest building of its kind when completed. It will be 300 feet wide and 350 feet long. All steel equipment, weighing 900 tons, which can be moved and stored away when not in use, will be used to house the cattle exhibit.

Blames Radio For Rain.

Wellington, O., June 21.--Charles B. Weedman of this city has been trying to find a cause for the wet weather encountered this year. "We know that radio is used extensively," he says, "and we know that electricity does play havoc in many ways, and I am fully convinced that wet weather will continue until the extensive use of radio is checked." It's up to the scientists to find a way out, he adds.

TWO CITIES HARD HIT

Progress of the Postal Employee
Strike in Canada.

Montreal, June 21.--This city and Toronto are the hardest hit by the strike of Canadian postal clerks. Reports from western and maritime provinces indicated the men are remaining at their posts. Halifax, N. S., and St. John's, N. B., important ocean mail points, reported the postal workers remaining loyal to the government and no tieup occurred. In Montreal, N. B., an important railway center, employees went out, but returned after a few hours. Quebec city employees are at work, but several of the railway mail service men are out. No serious delay is reported.

In Montreal a serious congestion has occurred and 200 postal workers on duty are unable to handle the large volume of mails addressed in French and English. Letter carriers are out to a man and no deliveries have been made.

Negro Murderer Hanged.

Tucson, Ariz., June 21.--William B. Ward, negro, was hanged at the state prison for the murder of Ted Grosh. An Arizona university student, Grosh was slain on Dec. 26, while riding in an automobile with Miss Maxine McNelly. Ward stopped their car and fired a bullet into the head of Grosh, killing him instantly. He then forced Miss McNelly from the car and to accompany him to an abandoned mine tunnel, where he attacked her and fired two shots into her body, leaving her for dead. She eventually recovered and was a witness against Ward.

THE WEATHER.

Ohio--Sunday: Showers; cooler.

MARKET QUOTATIONS

CHICAGO, June 21.

Cattle--Top steers, \$11.10; bulk of sales, \$8.80 to \$10.25; stockers and feeders, \$5.50 to \$7.50; calves, \$8.25 to \$9.50.
Hogs--Top, \$7.50; bulk of sales, \$7.40 to \$7.45; packing sows, \$6.35 to \$6.70; pigs, \$6.80 to \$8.35.
Sheep and Lambs--Native spring lambs, \$14.00; ewes, \$4.50 to \$5.25.
Receipts--Cattle, 3,000; hogs, 33,000; sheep and lambs, 9,000.

CLEVELAND, June 21.

Cattle--Steers, \$5.50 to \$10; heifers, \$6.50 to \$8.25; bulls, \$4.50 to \$6; cows, \$3.50 to \$5.50; calves, \$10 to \$15.
Hogs--Mixed, \$7.50; heavies, \$7.90; pigs and lights, \$6.75; roughs, \$5; stags, \$4.50.
Sheep and Lambs--Lambs, \$8.50 to \$15; sheep, \$2 to \$7.50.
Receipts--Cattle, 500; hogs, 4,000; sheep and lambs, 800.

PITTSBURGH, June 21.

Cattle--Steers, \$10 to \$15; heifers, \$3.75 to \$7.50; cows, \$6 to \$10; calves, top, \$10.
Hogs--Heavies and packers and butchers, \$7.75; mediums, \$7.70 to \$8; light sows, \$6.90; fat sows, \$6.50 to \$6.50; pigs, \$4.50 to \$5.50; stags, \$4.50 to \$5.
Sheep and Lambs--Lambs, \$7.15 to \$8; sheep, \$1 to \$6.

BALTIMORE, June 21.

Butter--Fancy creamery, \$13.50 to \$14; Ohio rolls, \$25 to \$30; store packed, 25c.
Eggs--Ohio fresh, 20 to 25c.

Urges Conferences

JOHN H. WALKER, president of the Illinois Federation of Labor, believes that an understanding between the American Legion and organized labor will accomplish great things. He said:

"There should be conferences from time to time between organizations of labor and the American Legion in every city in which there are Legion posts established, for the purpose of removing any misunderstandings that might arise. No real American denies the right of labor to organize for the betterment and protection of its members."

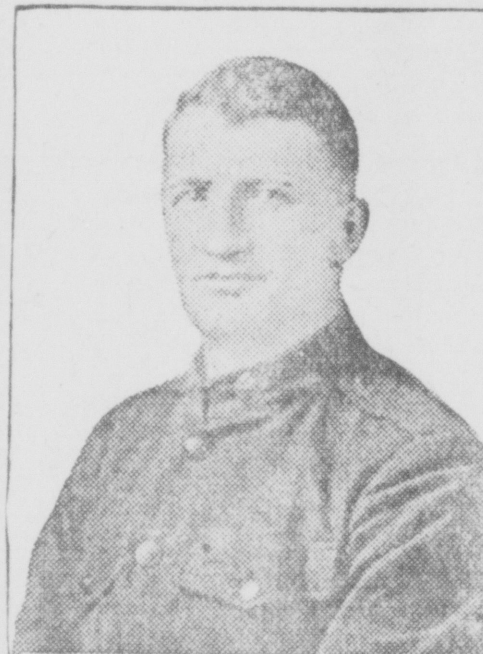

"That is exactly why the American Legion was organized—for the returned service men—that, and for the continued service to their country in peace as well as war."

MAKES VOCATIONAL TRAINING BIG CARD

If the vocational training department of the veterans' bureau advertised its activities in the magazines as do various correspondence schools, you would probably see the subject of the accompanying picture pointing a finger at you and inquiring if you, too, wanted to make a thousand dollars and royalties.

Here's the story: Richard G. Quehl of Peterson post, American Legion, Minneapolis, Minn., is a veteran whom the Germans picked on. In one year of service ten months were spent in France, and on two separate occasions Quehl was "at home" for the reception of steel-jacketed calling cards.

As a part of his vocational training he was farmed out to a Minneapolis

Richard G. Quehl.

maker of flour and cereal milling machinery, as a salesman. His employer told him to go into the shop and observe things, so that he would know the business from the ground up. Being a spectator didn't appeal to Quehl. He put on a pair of overalls and went to work at the bench.

His genius immediately showed itself and in no time at all he demonstrated some practical improvements in machinery design. His latest idea is an improvement on a disk separator for keeping the chaff from the wheat. He sold the idea for \$1,000 and royalties.

Now don't try to spoil this story by pointing out that Quehl was trained as a salesman. He is a versatile comrade. He also made good as a salesman and compiled the best catalogue that his company ever armed its sales force with.

Veteran of World War Poses as Real German

For once, John Thomas, a veteran of the World war, was glad that he could pose as a German, even though he had fought them on French soil in 1917 and 1918.

For Thomas escaped from Huertista rebels in Mexico by posing as a German, after the rebels learned that the United States had begun to supply the federalists with guns and munitions. Even then, he was tortured with hot irons, and his clothing taken from him, and escaped only through aid of friendly freight train conductors, who helped him make his way across the border.

Thomas was a miner employed by a British syndicate on the Jalisco-Guadalupe front, and the mine was attacked and wrecked by the Huertistas. He was taken prisoner with a group of federal soldiers and was accused of being a "gringo." He saw another American killed by the rebels.

"Americans are about as popular as rattlesnakes with the rebels just now," said Thomas to a group of American Legion members in El Paso, who provided him shelter and funds. "Since the United States began to send munitions to Obregon, they call it interference in their family scraps."

The rebels took 367 pesos—all the money he had—and left him almost naked, but he was freed when he claimed to be German. Then the loyalistic troops caught him and repeated this treatment.

To Aid Unemployed

In order to provide employment for ex-service men in and around Mobile, Ala., members of the American Legion in that city have arranged with local newspapers to carry advertising in the "Situations Wanted" column for local veterans without charge. A membership card in the American Legion or an honorable discharge is the only requirement.

Islands in St. Lawrence

The Thousand Islands is a collection of small islands, numbering 1,700 situated in an expansion of the St. Lawrence river, about forty miles long and from four to seven miles wide, between Ontario, Canada, and Jefferson and St. Lawrence counties, New York. They are favorite resorts for summer tourists on account of their picturesque beauty. Many are private property and contain the summer homes of wealthy Americans and Canadians.

First Democratic Platform

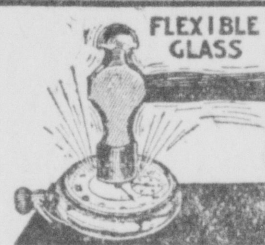

The first complete platform ever adopted by the Democratic party was put forward by the national convention which met at Baltimore in 1840 and renominated Van Buren for the presidency. Parts of this platform were incorporated into the deliverance of every Democratic national convention prior to the Civil war, and its leading ideas have reappeared in many of the party platforms of the last sixty years.

Making Goldbeaters' Skin.

Gold was first hammered between parchment leaves until the mold, termed goldbeaters' skin, was invented. This skin is made from a membrane of the ox and the secret of its making is kept by a family in London which has made the membrane for three generations. Three months are consumed in the treatment of the membrane and it may be beaten continuously for months with a sixteen-pound hammer without material injury.

New Baking Machine.

The latest baking machinery receives the flour at one end, sifts it, mixes and kneads the dough, and puts it into pans, which pass through an oven. The finished loaf emerges at the other end of the machine.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

"Potato States"

The leading potato-producing states in the country, in order of acreage, are New York, Michigan, Wisconsin, Minnesota, Pennsylvania and Maine. These harvest nearly half the total crop of the country, which averages more than 374,000,000 bushels annually.

Mineral Product Values Great.
The value of the mineral products of the United States in the last two years reached a record-breaking total in excess of \$10,000,000,000.

DO YOU KNOW THAT

1. Run-down shoe heels are not easy seen by the wearer, but they detract greatly from your otherwise good appearance?

Urges Conferences

JOHN H. WALKER, president of the Illinois Federation of Labor, believes that an understanding between the American Legion and organized labor will accomplish great things. He said:

"There should be conferences from time to time between organizations of labor and the American Legion in every city in which there are Legion posts established, for the purpose of removing any misunderstandings that might arise. No real American denies the right of labor to organize for the betterment and protection of its members."

"That is exactly why the American Legion was organized—for the returned service men—that, and for the continued service to their country in peace as well as war."

MAKES VOCATIONAL TRAINING BIG CARD

If the vocational training department of the veterans' bureau advertised its activities in the magazines as do various correspondence schools, you would probably see the subject of the accompanying picture pointing a finger at you and inquiring if you, too, wanted to make a thousand dollars and royalties.

Here's the story: Richard G. Quehl of Peterson post, American Legion, Minneapolis, Minn., is a veteran whom the Germans picked on. In one year of service ten months were spent in France, and on two separate occasions Quehl was "at home" for the reception of steel-jacketed calling cards.

As a part of his vocational training he was farmed out to a Minneapolis

Richard G. Quehl.

maker of flour and cereal milling machinery, as a salesman. His employer told him to go into the shop and observe things, so that he would know the business from the ground up. Being a spectator didn't appeal to Quehl. He put on a pair of overalls and went to work at the bench.

His genius immediately showed itself and in no time at all he demonstrated some practical improvements in machinery design. His latest idea is an improvement on a disk separator for keeping the chaff from the wheat. He sold the idea for \$1,000 and royalties.

Now don't try to spoil this story by pointing out that Quehl was trained as a salesman. He is a versatile comrade. He also made good as a salesman and compiled the best catalogue that his company ever armed its sales force with.

Veteran of World War Poses as Real German

For once, John Thomas, a veteran of the World war, was glad that he could pose as a German, even though he had fought them on French soil in 1917 and 1918.

For Thomas escaped from Huertista rebels in Mexico by posing as a German, after the rebels learned that the United States had begun to supply the federalists with guns and munitions. Even then, he was tortured with hot irons, and his clothing taken from him, and escaped only through aid of friendly freight train conductors, who helped him make his way across the border.

Thomas was a miner employed by a British syndicate on the Jalisco-Guadalupe front, and the mine was attacked and wrecked by the Huertistas. He was taken prisoner with a group of federal soldiers and was accused of being a "gringo." He saw another American killed by the rebels.

"Americans are about as popular as rattlesnakes with the rebels just now," said Thomas to a group of American Legion members in El Paso, who provided him shelter and funds. "Since the United States began to send munitions to Obregon, they call it interference in their family scraps."

The rebels took 367 pesos—all the money he had—and left him almost naked, but he was freed when he claimed to be German. Then the loyalistic troops caught him and repeated this treatment.

To Aid Unemployed

In order to provide employment for ex-service men in and around Mobile, Ala., members of the American Legion in that city have arranged with local newspapers to carry advertising in the "Situations Wanted" column for local veterans without charge. A membership card in the American Legion or an honorable discharge is the only requirement.

Islands in St. Lawrence

The Thousand Islands is a collection of small islands, numbering 1,700 situated in an expansion of the St. Lawrence river, about forty miles long and from four to seven miles wide, between Ontario, Canada, and Jefferson and St. Lawrence counties, New York. They are favorite resorts for summer tourists on account of their picturesque beauty. Many are private property and contain the summer homes of wealthy Americans and Canadians.

First Democratic Platform

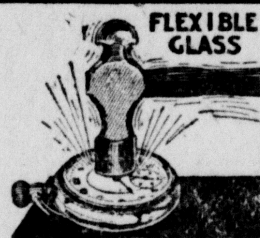

The first complete platform ever adopted by the Democratic party was put forward by the national convention which met at Baltimore in 1840 and renominated Van Buren for the presidency. Parts of this platform were incorporated into the deliverance of every Democratic national convention prior to the Civil war, and its leading ideas have reappeared in many of the party platforms of the last sixty years.

Making Goldbeaters' Skin.

Gold was first hammered between parchment leaves until the mold, termed goldbeaters' skin, was invented. This skin is made from a membrane of the ox and the secret of its making is kept by a family in London which has made the membrane for three generations. Three months are consumed in the treatment of the membrane and it may be beaten continuously for months with a sixteen-pound hammer without material injury.

New Baking Machine.

The latest baking machinery receives the floor at one end, sifts it, mixes and kneads the dough, and puts it into pans, which pass through an oven. The finished loaf emerges at the other end of the machine.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

"Potato States"

The leading potato-producing states in the country, in order of acreage are New York, Michigan, Wisconsin, Minnesota, Pennsylvania and Maine. These harvest nearly half the total crop of the country, which averages more than 374,000,000 bushels annually.

Mineral Product Values Great.

The value of the mineral products of the United States in the last two years reached a record-breaking total in excess of \$10,000,000,000.

DO YOU KNOW THAT

WILL CHART STORMS FROM U. S. BALLOON

Weather Man Plans Flights to Study Winds.

Washington.—The first of fifteen flights in a free balloon which will ride the storms in an effort to learn more about them, will be begun by Dr. LeRoy Meisinger of the central office of the United States weather bureau. The flights are part of the most ambitious plans for scientific exploration of the atmosphere ever to be undertaken and they will be carried on through the co-operation of the weather bureau and the United States air service. All will start from Scott Field, Illinois, not far from St. Louis. They will be made in a hydrogen-filled balloon, furnished and piloted by the weather bureau with a full set of meteorological instruments. The balloon will be a large one, about 40 feet in diameter and holding 35,000 cubic feet of gas.

The main purpose of the flights is to study the motions of large masses of air with reference to the ground, when they are influenced by the great whirls in the atmosphere, hundreds of miles in diameter, which the meteorologists call cyclonic storms and which in their passage across the country give us most of the many varieties of our weather. The motion of the air with reference to the centers of these storms is fairly well known, but these centers are always themselves in motion and just what happens to the air in them or above them is not understood.

Doctor Meisinger proposes to find out, by going up in a balloon in the storm to a height of 10,000 feet, and then sticking by it as long as it is possible to do so, mapping out his location from time to time, and at the end charting the whole voyage, which will give the track not only of the balloon, but also of the air in which it rode. He proposes to take some trips in front of storms, some near their centers, others trailing behind them, to study the behavior of the air in each case.

New Hotel Will Inclose Existing Baptist Church

New York.—A 15-story hotel and church will soon be built around and over the old Calvary Baptist church on West Fifty-seventh street, while the congregation will continue to sit in their accustomed seats Sunday after Sunday. The contractors have announced that the wings which form the main part of the hotel and the roof can be brought into being without interfering with the use of the auditorium.

The magnificent auditorium of the present church will remain as it has been since the church was built over seventy years ago, but the present gallery will be enlarged and a second one constructed so that the seating capacity of the new church will be 4,000. Wings on either side of the present church and 12 stories immediately above it will be built and leased for operation as a hotel for Christian people.

Cost of the improvements will be about \$2,000,000, but it is expected that the hotel will turn in enough rental to the church to enable it to considerably widen its scope of activities.

A radio broadcasting station will be one of the features of the new building.

It's Good Joss for Junk to Cross Steamer's Bow

Seattle, Wash.—"It's a good joss for a Chinese junk to cross the bows of a big overseas steamship, but it unnerves shipmasters, who have to use utmost care to avoid collisions," declared Capt. John Griffith of the President Jackson, here from the Orient.

"Each junk has two light blue eyes, one painted on each side of the bow. Upon approach these figures give the craft with black tall sails and elevated sterns a dragonlike aspect. The Chinese mariners believe the eyes are necessary, and no junk will venture offshore without them. Mariners of the China coast assert that if a big liner just misses them or strikes them a glancing blow, the 'good joss' is perched on the bows of their vessel for months."

Dogs in Tug of War

Wallingford, Conn.—Two toy dogs, holding a tug of war over a piece of meat, held up traffic on the busy Hartford road here, ignored efforts of police to get them out of the way and simply didn't hear the din of scores of horns. Two motorists picked the animals up and placed them on a sidewalk, where they were still tugging when the last blockaded machine went by.

Crops Raised in 1923 Worth Twelve Billion

Washington.—Crops raised and live stock produced on American farms last year were worth \$12,204,000,000, the Department of Agriculture reported. This was \$900,000,000 more than in 1922. The total includes \$9,053,000,000 for crops and \$3,111,000,000 for animal products, less \$3,860,000,000, the value of crops fed to live stock.

The wheat crop was worth \$726,000,000, as compared with \$874,000,000 in 1922 and \$2,080,000,000 in 1919.

"Prince Rupert's Drops"

"Prince Rupert's Drops" is the name given to tadpole-shaped pieces of glass, formed by melting the glass and allowing it to drop into cold water. If the point of the tail of one of these be broken off, the whole will at once shiver to pieces with a loud report.

Owing to the sudden cooling, the particles have not had sufficient time to arrange themselves in a stable manner, and hence they fly asunder as soon as the structure is broken. These curious drops are commonly supposed to have been discovered by Prince Rupert, the grandson of James I of England, but Faraday says that they were simply brought by him into England in 1680.—Detroit News.

Idolized

"It says here, 'One of the idols most revered by heathen is a figure of a woman, seated, resting her chin in her hands,'" said Mrs. Farr, reading from a book.

"Which proves they are about the wisest people on earth," suggested her husband.

"How so, Orrin?"

"Well," said Mr. Farr, with emphasis, "because they make a deity of a woman who has sense enough to give her chin a rest."—Pathfinder.

Augustan Age of Rome

The Augustan age was the most brilliant period in the history of Roman literature, taking its name from the Emperor Augustus, who generously aided and encouraged the writers who lived in his reign. It was the time of Horace, Ovid and Vergil, the age which saw the highest development of the Latin language and in which literary men received the highest honors, says the Detroit News. In England the term later was applied to a corresponding period of great literary activity, the age of Steele, Addison and Swift, and in France to the reign of Louis XIV.

HERRICK REFRIGERATORS

The Big Difference In Refrigerators

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it doesn't increase your ice bills.

The Herrick answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simply because the Herrick is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

- No. 1. Circulation of cold dry air.
- No. 2. Effective Insulation.
- No. 3. Air-tight construction.

That the Herrick has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

DAWES' REPORT.

By a vote of 247 to 183 the German Reichstag voted to accept the Dawes report. Opposition on the part of old imperialists was intense but the common people, who are weary of war and its awful penalties, are willing to pay the price and make the best of a sad situation. The only protest they offer is against the charge that Germany was surrounded by a ring of steel and was compelled to fight for life.

WOMEN IN CONVENTION.

Whatever else may be said of it the atmosphere of this year's Republican convention is higher than that of any of its long list of ancestors. There was less drinking than at any previous party convention, there was no smoking and the presence of so many women added a tone hitherto unknown.

It is a question whether the dryness of the proceedings—of which there was a chorus of complaint is not due in part to the leavening influence of the women, and whether they will not serve to ballast in the future those ebullitions dear to every convention goer. Women were notably absent from the demonstration around the sitting Wisconsin delegates.

Will women stampede, shriek in enthusiasm, forget all their customary quietness of four years to join in a typical convention outburst every presidential year? Maybe. They didn't start it in Cleveland; perhaps they will in New York. Or perhaps their long experience in unimpassioned club work and their natural sense of decorum will lay a restraining hand upon them. It is does, then a change is come over national political conventions dating from this one.

NO PLACE FOR IDLERS.

There is one bloc with which President Coolidge is perhaps most unpopular. It is the idler bloc. The president repeatedly has preached, and practiced, the doctrine of hard work. His latest utterance on the subject was at commencement exercises at Georgetown university Monday. On that occasion the president said the world was ready to give to trained minds "a warmer welcome, a larger share in the tasks than ever before."

But, he emphasized, there is trouble ahead for those who insist upon "tall and stiff collars as a part of the working uniform, whether such collars are of the intellectual type of mind or the linen type for the neck." The president could not see a place for individuals who are "too nice to work." To these, he said, the world is likely to prove a "bit cold."

That kind of talk, of course, is unpleasant to those who expect an easy time in the world. To many it may not be at all alluring when the president declares "there will never be a saturation point, a danger of overproduction, in good, working, capable brains." The world is not a place for the easy-going. It can offer him practically nothing. Dislike or attempted evasion of that fact will not change it.—Kansas City Star.

GRANGE SOCIAL

Darbyville Grange, No. 2322, will give an ice cream and strawberry social at the home of Mr. and Mrs. Harold Wilson Friday evening, June 27.

Fill Hot Water Bag

After filling a rubber water bottle with hot water it is a good plan to press the sides of the bottle together before putting in the stopper. This allows all the steam to escape, no matter how hot the water may be.

PERSONALS

Mrs. Ralph Curtin spent the day in Columbus.

Mr. and Mrs. A. W. Valentine spent the day in Columbus.

Miss Fern Gooley, of New Holland, spent the day in Columbus.

F. J. Armstrong of Laurelville was a business visitor in Columbus today.

Miss Ruth Cryder is visiting Mr. and Mrs. Lee Barnhart in Chillicothe.

Miss Charlotte Titsworth, of Knoxville, Tennessee, is the guest of Miss Huldah Seyfert.

Mrs. L. B. James, Mrs. Harry S. Lewis, Mrs. Thomas W. Brown and Mrs. Joseph G. Wilder visited Antioch college Friday.

Mr. and Mrs. Wade H. Cook and daughter and Miss Laura Mantle, motored to Dayton today to spend the weekend with friends.

Miss Mabel Bowman, daughter of Mr. and Mrs. E. C. Bowman, returned to Cincinnati Thursday where she will teach a summer school.

Miss May Runyan, field officer for the Girls' Industrial school, was in the city today the guest of Mrs. Carrie Patton, probation officer.

Mrs. Edith Neff and W. E. Phillips of Stoutsville, went to Springfield today to spend the weekend with the latter's sister, Mrs. Silas Rockwell.

Mr. and Mrs. Rowe Gussman and children, Virginia and John Oakley, went to Frankfort, Indiana, today to visit her father, J. M. Barnes, and family.

Mrs. W. H. Marion went to Hamilton today to spend the weekend with her son Clarke Marion and family. She will also go to Cincinnati to visit her sister, Mrs. T. J. Stewart, for a few days before returning home.

Mr. and Mrs. Harry D. Reichelderfer of Ashville, and Miss Anna Reichelderfer and Mrs. Fannie Rignin left today on a motor trip to Toronto, Canada. Enroute they will stop to visit Niagara Falls and other points of interest.

AUTO BURNED.

The fire department Friday night at 9:50 o'clock answered a telephone call three miles south of the city to extinguish a fire in the automobile of Charles Fannin. The entire top of the machine was burned off.

AMUSEMENTS

Jacqueline Logan, Percy Marmont, Sigrid Holmquist and David Torrence are featured players in George Melford's Paramount production, "The Light That Failed," from Rudyard Kipling's story which will be on view at the Met for two days beginning Monday.

Jacqueline Logan, who heads the cast, is one of the best known heroines of the screen. She has appeared in many Paramount pictures in roles which called for unusual ability and has a large following. Fourteen pictures in two years is the medium thru which this popular player has won her way to public favor. Among these are "White and Unmarried," "Ebb Tide," "Java Head" and "Mr. Billings Spends His Dime" and "Salome Jane."

Percy Marmont, who plays the role of "Dick Helder," opposite Miss Logan's characterization of "Bessie Brooke" is an English actor whose appearance and experience render him especially fit for this role. Mr. Marmont is well known in England where he achieved distinction in motion pictures and on the stage.

In the role of "Maisie Wells," Sigrid Holmquist is given an opportunity to display her talents.

She already possesses a following which her recent Paramount picture, "A Gentleman of Leisure," in which she appears with Jack Holt, has done much to increase.

David Torrence, who plays "Torpenhow," is a brother of Ernest Torrence of "Covered Wagon" fame and has many successes to his own credit.

Much of the story action in "The Light That Failed" is located in Port Said and the Soudan country. This is one of the most ambitious pictures yet produced by George Melford. It shows the terrible hardships of the Soudan campaign which avenged the death of General Gordon at Khartum. Among the big scenes is a surprise attack by desert tribesmen on the British camp. Several thousand minor players participated.

The love interest between two of the strangest sweethearts ever seen on the screen has as a background a passage in nineteenth century history which is filled with color and drama. Luke Cosgrave and Mabel Van Buren are in the supporting cast.

Our want ads bring results.

RING SYMBOL OF FAITH AND POWER

In Olden Times Always Associated With Magic.

It needed no Aladdin story to assure the credulous that rings have mystical powers, which might be invoked by the initiate with the certainty that one of the genii will appear to do our bidding.

From time immemorial man (and especially woman) has adorned his person with all kinds of fetishes and charms, not only to add to his beauty of appearance, but very often to enhance his dignity, to impress others with his grandeur, wealth and power. Of all these ornaments the ring surpasses every other bijou, even the crown royal, which it actually outshines by its traditional power and quaint and varied symbolism.

In olden times it was more for its magic than for its beauty or value that the ring was worn. Rings innumerable have been preserved in national collections all over the world, have been among the treasure found by archeologists in their excavations or garnered by collectors and connoisseurs. Some of these, entombed 3,000 years with Tut-Ankh-Amen, are eloquent witnesses of the highly developed art of their original period, and the artistic imagination of Egyptian craftsmen.

The ring has always been a symbol of faith and power. By his ring the Pharaoh invested Joseph with his authority.

Darius sealed with his ring the entrance to the lions' den, where Daniel spent a night. An almost infinite power was attributed to King Solomon's sealing ring, upon which was engraved that mysterious word, "Shemhampharaoth."

By its magic, according to tradition, King Solomon was able to summon a demon who helped him to build the temple of Jerusalem, and every day carried the king up to the firmament where he learned to understand the secrets and wonders of the universe.

Ancient authors describe the celebrated ring of the Greek Polykrates, tyrant of Samos. This jewel was a large emerald, upon which were engraved a lyre, a bee, a bull's head and a dolphin. According to legends, Polykrates was so fortunate in everything he undertook that his friend, the king of Egypt, who was visiting him, warned him that this unprecedented luck would invite the envy of the gods, who never permit a mortal to be entirely happy.

"Beware the jealousy of the immortals," warned the Egyptian, "and sacrifice to them whatever is dearest to you."

Polykrates, awed by the king's advice, took the ring, as being his most precious possession, and threw it into the sea, but next morning it was returned to him, discovered by the royal cook in a fish he was preparing for his master's luncheon.

Upon this proof that the gods would not accept the sacrifice from Polykrates, the king of Egypt left him, but history records that Polykrates was afterward slain in an uprising of his subjects.

Friendly With Snakes

At Port Elizabeth, South Africa, attached to the Natural History Museum and Aviary, is a large "snake garden," where poisonous reptiles live in perfect freedom, among their natural surroundings. The garden is, of course, cut off from the rest of the world by a concrete wall.

Its keeper is a negro who has worked in the snake garden from the days of his childhood and has actually succeeded in building up a real friendship with his scaly charges. Protected only by gauntlet gloves and leather puttees, with his other clothing merely the regulation uniform of the museum, he fearlessly enters the inclosure and freely handles his pets.

When one considers that the majority of the snakes in the garden are of the most deadly varieties—the African cobra, the puff-adder and the fer-de-lance among others—one would think twice before offering to swap jobs with the keeper of the reptile house.

Poisonous snakes are popularly believed to be untamable, but the negro keeper at Port Elizabeth seems to prove that if not actually affectionate, they can be persuaded by kindness to tolerate human companionship.

The snakes in the Port Elizabeth garden are not used for display purposes only. Their venom, extracted, is used in the preparation of serums and antidotes for snake-bite.

Hospitality

A good friend of mine, Franklin T. Miller, says that if nobody speaks a pleasant word to him during the early part of the day he becomes gloomy and less efficient as the hours go by. If, however, on his way to the office, the corner policeman touches his hat and says in a cheery voice, "Good morning! Glad to see you looking so well this morning," it will materially increase his efficiency. Hospitality is the one thing which is unlimited in supply, can be manufactured from nothing and without expense, is in great demand and yields huge profits.—Roger W. Babson.

Havoc by Windstorms

Windstorms without rain have made the Waimate district in New Zealand desolate. All raspberries were blown from the bushes, orchards were stripped, grain threshed out, grass buried and cattle have died from starvation. The farmers have appealed to Dundee citizens for help.

SUNDAY SERVICES

Hours of Worship in the Different Churches.

Subjects of Sermons on Which Pastors Will Preach Morning and Evening—Other Meetings of a Religious Character.

ST. JOSEPH'S CHURCH.

West Mound St.

Rev. Father J. S. Hannan, Pastor.

Low mass followed by benediction at 6 o'clock; also a low mass at 8 o'clock.

SILVER MEDAL

Mrs. Edward H. Wardell Won First Prize in the Matron's Contest.

The Williamsport Woman's Christian Temperance Union had a most interesting Matrons' Silver Medal contest in the Methodist Episcopal church Thursday evening.

There were seven contestants as follows: Mrs. Mabel Pitt, Mrs. Esther Wardell, Mrs. Bessie Schleich, Mrs. Verda Smiley, Mrs. Kittie Adkins, Mrs. Frances Hammon and Mrs. Wanda Wardell.

The judges were Prosecuting Attorney Meeker Terwilliger, H. W. Plum and George G. Adkins, of this city. The medal was awarded to Mrs. Wanda Wardell, whose subject was "At the Chiming of the New Year's Bells," and the presentation was made by Mr. Adkins. Each of the other contestants was given a W. C. T. U. pin.

The program was most excellent and all the contenders acquitted themselves in a most creditable manner.

The pleasure of the evening was further enhanced by vocal solos by Miss Laura McGhee, piano solos by Miss Florence Hess and a duet by Mrs. Bessie Schleich and Mrs. Jessie Bolender.

OHIO GIRL BECOMES HER MOTHER'S SISTER-IN-LAW.

When Miss Clara Myer, aged 16, married John E. Gressman, 31, at Fremont, she became a sister-in-law to her mother. Her husband already was a brother-in-law to his mother-in-law, Miss Myer's mother having previously married Gressman's brother.

ELECTED DELEGATE.

L. M. Mader returned from Cincinnati Friday after attending the Ohio State Funeral Directors' convention in session this week. Mr. Mader was elected as a delegate to the National convention to be held at St. Paul, Minnesota, next October.

Its keeper is a negro who has worked in the snake garden from the days of his childhood and has actually succeeded in building up a real friendship with his scaly charges. Protected only by gauntlet gloves and leather puttees, with his other clothing merely the regulation uniform of the museum, he fearlessly enters the inclosure and freely handles his pets.

When one considers that the majority of the snakes in the garden are of the most deadly varieties—the African cobra, the puff-adder and the fer-de-lance among others—one would think twice before offering to swap jobs with the keeper of the reptile house.

Poisonous snakes are popularly believed to be untamable, but the negro keeper at Port Elizabeth seems to prove that if not actually affectionate, they can be persuaded by kindness to tolerate human companionship.

The snakes in the Port Elizabeth garden are not used for display purposes only. Their venom, extracted, is used in the preparation of serums and antidotes for snake-bite.

Hospitality

A good friend of mine, Franklin T. Miller, says that if nobody speaks a pleasant word to him during the early part of the day he becomes gloomy and less efficient as the hours go by. If, however, on his way to the office, the corner policeman touches his hat and says in a cheery voice, "Good morning! Glad to see you looking so well this morning," it will materially increase his efficiency. Hospitality is the one thing which is unlimited in supply, can be manufactured from nothing and without expense, is in great demand and yields huge profits.—Roger W. Babson.

Havoc by Windstorms

Windstorms without rain have made the Waimate district in New Zealand desolate. All raspberries were blown from the bushes, orchards were stripped, grain threshed out, grass buried and cattle have died from starvation. The farmers have appealed to Dundee citizens for help.

SUNDAY SERVICES

Hours of Worship in the Different Churches.

Subjects of Sermons on Which Pastors Will Preach Morning and Evening—Other Meetings of a Religious Character.

SILVER MEDAL

Mrs. Edward H. Wardell Won First Prize in the Matron's Contest.

The Williamsport Woman's Christian Temperance Union had a most interesting Matrons' Silver Medal contest in the Methodist Episcopal church Thursday evening.

There were seven contestants as follows: Mrs. Mabel Pitt, Mrs. Esther Wardell, Mrs. Bessie Schleich, Mrs. Verda Smiley, Mrs. Kittie Adkins, Mrs. Frances Hammon and Mrs. Wanda Wardell.

The judges were Prosecuting Attorney Meeker Terwilliger, H. W. Plum and George G. Adkins, of this city. The medal was awarded to Mrs. Wanda Wardell, whose subject was "At the Chiming of the New Year's Bells," and the presentation was made by Mr. Adkins. Each of the other contestants was given a W. C. T. U. pin.

The program was most excellent and all the contenders acquitted themselves in a most creditable manner.

The pleasure of the evening was further enhanced by vocal solos by Miss Laura McGhee, piano solos by Miss Florence Hess and a duet by Mrs. Bessie Schleich and Mrs. Jessie Bolender.

OHIO GIRL BECOMES HER MOTHER'S SISTER-IN-LAW.

When Miss Clara Myer, aged 16, married John E. Gressman, 31, at Fremont, she became a sister-in-law to her mother. Her husband already was a brother-in-law to his mother-in-law, Miss Myer's mother having previously married Gressman's brother.

ELECTED DELEGATE.

L. M. Mader returned from Cincinnati Friday after attending the Ohio State Federal Directors' convention in session this week. Mr. Mader was elected as a delegate to the National convention to be held at St. Paul, Minnesota, next October.

Some Never Learn

We learn early not to talk with our mouth full; a lot harder it is to learn not to talk with our head empty.—Boston Transcript.

APOPLEXY

Caused Death of Mrs. John Buehler—
Funeral Services Tuesday.
Mrs. Minnie Henrietta Buehler died at her home, 423 Half avenue, Friday evening at 5 o'clock. The deceased had been ill for the past six months and her death was due to apoplexy.
She was born July 4, 1856, and had been a resident of this county 52 years.
She married John George Buehler, who died several years ago. One son and two daughters survive. They are John Buehler and Mrs. Blanche R. Mavis of this city, and Mrs. Augusta Tobias, of Columbus and the following grandchildren; Mrs. Clarence Weidner, Mary Henrietta and Martha Jane Mavis, Clarence Weidner Jr., and the following stepchildren Mrs. K. Redwood and Mrs. Joseph Eyerman.

The funeral services will be held at her late home Tuesday afternoon, June 24, at 3 o'clock. Rev. Mr. Ferguson will officiate. Interment will be in Forest cemetery. The pallbearers will be Harrison Bartley, Ralph Long, John Bowsher, Harry Merz, Charles Hall and Sherman Binkley.

The Worm Turns.
English paper: "Wanted, a loud, second hand gramophone, for reprisals."

LEGAL NOTICE OF BOND SALE.

Sealed proposals will be received by the Finance Committee of Council of the City of Circleville, Ohio, at the office of the City Auditor of said City, until 12 o'clock, noon, of Monday, July 21st, 1924, for the purchase of bonds of said City of Circleville, Ohio, in the aggregate sum of \$16,300.00. (Sixteen Thousand Three Hundred Dollars) dated as of the day of sale; said bonds shall be serially numbered from No. 1 to No. 12, both inclusive; each of said bonds shall be of the denomination of \$500.00 except bond No. 33, which shall be of the denomination of \$300.00; they shall be dated as of the day of sale of the same; they shall bear interest at the rate of five and one-half per cent per annum, payable semi-annually, on the first days of March and September of each year until the principal sum is paid. The first interest is to be paid March 1, 1925. Said bonds shall mature as follows:

- Nos. 1, 2 and 3, September 1, 1925.
- Nos. 4, 5 and 6, September 1, 1926.
- Nos. 7, 8 and 9, September 1, 1927.
- Nos. 10, 11, 12 and 13, September 1, 1928.
- Nos. 13, 14, 15, 16 and 17, September 1, 1929.
- Nos. 18, 19, 20 and 21, September 1, 1930.
- Nos. 22, 23, 24 and 25, September 1, 1931.
- Nos. 26, 27, 28 and 29, September 1, 1932.
- Nos. 30, 31, 32 and 33, September 1, 1933.

Said bonds shall be designated West High Street Improvement Bonds, to be issued for the purpose of improving West High Street from the east line of Western Avenue to the east line of Court Street by paving the same and constructing curbs and sidewalks and under authority of the laws of Ohio and of Section No. 3414 of the General Code of Ohio, and under and in accordance with a certain ordinance No. 193 of said City, "To issue bonds in anticipation of the collection of special assessments for the improvement of West High Street from the east line of Western Avenue to the east line of Court Street, in the City of Circleville, Ohio, to pay the abutting property owners' share of the cost and expense of said improvement, passed on the 4th day of June, 1924."

Said bonds will be sold to the highest and best bidder for not less than par and accrued interest to date of delivery. All bids must state the number of bonds bid, for and the gross amount of bid and accrued interest to date of delivery. All bonds to be accompanied with a certified check on a solvent bank for five per cent of the bid, payable to the treasurer of said city, upon condition that if the bid is accepted, the bidder will receive and pay for such bonds as set forth above, within ten days from the date of sale made. Said check to be retained by the city, if the condition is not fulfilled. The city reserves the right to reject any and all bids.

The Finance Committee of the City of Circleville, Ohio.

LEGAL NOTICE OF BOND SALE.

Sealed proposals will be received by the Finance Committee of Council of the City of Circleville, Ohio, at the office of the City Auditor of said City, until 12 o'clock, noon, of Monday, July 21st, 1924, for the purchase of bonds of said City of Circleville, Ohio, in the aggregate sum of Six Thousand Dollars (\$6000.00) dated as of the day of sale; said bonds shall be serially numbered from 1 to 12, both inclusive, and each one of said bonds shall be of the denomination of \$500.00; they shall bear interest at the rate of five and one-half per cent per annum, payable semi-annually, on the first days of March and September of each year until the principal sum is paid. The first interest is to be paid March 1st, 1925. Said bonds shall mature as follows:

- Bond No. 1, Sept. 1st, 1925; Bond No. 2, Sept. 1st, 1926; Bond No. 3, Sept. 1st, 1927; Bond No. 4, Sept. 1st, 1928; Bond No. 5, Sept. 1st, 1929; Bond No. 6, Sept. 1st, 1930; Bonds Nos. 7 and 8, Sept. 1st, 1931; Bonds Nos. 9 and 10, Sept. 1st, 1932; Bonds Nos. 11 and 12, Sept. 1st, 1933.

Said bonds shall be designated as the West High Street City Improvement Bonds. The proceeds of said bonds are to be used for no other purpose than that for which they are issued. They are to be payable in not more than ten years from date, to be issued for the purpose of paving West High Street, from the east line of Western Avenue to the west line of Court Street by paving the same and constructing curbs and walks and under authority of the laws of Ohio and of Section No. 3821 of the General Code of Ohio, and under and in accordance with No. 192 of said city entitled "Providing for the issuance of bonds of the city of Circleville, Ohio, for the purpose of paving said city's share of the cost of improving West High Street from the east line of Western Avenue to the west line of Court Street in said City," passed on the 4th day of June, 1924. Said bonds will be sold to the highest and best bidder for not less than par and accrued interest, to date of delivery. All bids must state the number of bonds bid for and for the gross amount of bid and accrued interest to date of delivery. All bonds to be accompanied with a certified check on a solvent bank payable to the treasurer of said city, upon condition that if the bid is accepted, the bidder will receive and pay for such bonds as above set forth within ten days from the time of award. Said check to be retained by the city if said condition is not fulfilled. The City reserves the right to reject any and all bids.

The Finance Committee of Council of the City of Circleville, Ohio.
By L. T. Shaner, Chairman.

WOMAN'S DREAD OF ADVANCING YEARS

Pathetic, Sometimes, Are Efforts to Conceal Age.

I have yet to meet a sincere woman who will own to me that the prospect of old age has no terrors for her, writes the Hon. Mrs. John Fortescue in the London Mail. Some women dread the inevitable loss of beauty and its attendant power; others the decrease of vitality and desire for enjoyment; while the unselfish woman fears only to become a burden upon those she loves.

But the woman who tries with transparent artifice to deceive herself and the world as to her age is to my mind the most pitiful figure in the universe. We have all seen her—the absurd though pathetic doll woman who wears in the summer youthful hats of lace with cherries bobbing over one eye or ear, and little, short, sleeveless chemise frocks more suitable for her daughter of nineteen. Often she will carry a miniature parasol or be leading a toy Pomeranian dog with a large, pale blue ribbon bow on his collar.

By her side occasionally walks her youngest daughter, a miserably self-conscious, gawky child of twelve or thirteen years, dressed to look as though she were still in the nursery. The poor child is made the victim of her mother's vanity in the hope of deluding the beholder into the belief that both she and her mother are younger than they are.

The effort of some mothers to appear younger than they are is sometimes due to quite a laudable motive. They think that by accompanying their daughters around and joining actively in the round of gaiety and entertainments they will retain their influence over their children and share their confidence. Personally, I think this is a mistaken idea. It is the looker-on, not the player, who sees most of the game and whose judgment is therefore of far greater value.

In the professional world, of course, it becomes absolutely necessary for both men and women to appear as young as they possibly can—for engagements of all kinds are given in preference to youth. A curious and pathetic fact illustrates this. The immediate result of the passing of the employers' liability act was that the supply of cheap hair dye in England ran out! Until the insurance companies issued policies covering all risks to employees no employer would engage any but youthful applicants; and therefore it became necessary for all applicants to appear youthful.

But how beautiful it is to watch a woman of leisure growing old gracefully. Some there are whose spirit is so brave and joyous, whose capacity for entering into the happiness and interests of those around them—particularly of the younger generation—is so great that they seem to capture the youth as well as the love and confidence of the young people with whom they come in contact. And then what matter white hairs, a vague figure, and a few wrinkles if the eyes are bright and laughing, the mind alert and the heart full of joy, sympathy and contentment.

Takes Messages on Fly

The British air service in Mesopotamia has perfected a scheme for delivering written messages to planes without the necessity of their landing and stopping to pick up the documents.

A line is stretched between two poles about 6 feet high and perhaps 20 feet apart. To this line the message is tied. By spreading large pieces of cloth on the ground in a prearranged pattern the pilot of the aircraft is signaled that there is a message for him; the arrangement of the cloth also indicates in what direction he must fly to cross the line between the poles at right angles. If more than one plane is up, the cloth again tells which plane is to receive the message.

The selected plane swoops low over the poles, and the pilot dangles a line to the end of which is attached a hook. This engages the line to which the message is tied, and line, message and all are dragged into the air. The pilot reels in his catch as the plane speeds away. If the message is to be delivered the plane simply dives to the point of delivery and drops the message.

The pilots have become very expert at picking up and dropping messages in this fashion.

Exit the Man

Despite the fact that leap year is well under way and eligible women should be looking about for prospective matches, a clerk in the Juvenile court the other day flatly turned down an offer for a husband.

A woman who comes in regularly to collect alimony, and who is slightly deaf recently asked: "Why don't you get married?" When informed that it was the lack of a man she said that she would obtain one. A few days ago she returned and announced: "Well, I've got you a man."

The man, who was anxiously waiting out in the corridor, departed hastily, however, when the clerk exclaimed, "I don't want him."—Indianapolis News.

Her Idea of Mother

Emily Ann, age four, and her sister, scarcely two years her senior, were playing in the front room.

"Now, Emily," chided Jean, "don't get against that fern any more. You'll make it turn brown and it will die."

Emily looked at her sister with disgust and scornfully said, "Aw, you're not my mother."

MARRIAGE VOWS TAKEN

Miss Elizabeth Alice Bales is Bride of Mr. Barton Ruffell Deming.

Ceremony Was Performed by Rev. Edwin K. Johnson, Assisted by Rev. Charles V. Reeder at Home of Bride's Parents, Dr. and Mrs. Glenn R. Bales.

Miss Elizabeth Alice Bales, only daughter of Dr. and Mrs. Blenn Rife Bales, was married to Mr. Barton Ruffell Deming, son of Mr. and Mrs. Grant Deming, of Cleveland, Friday evening at six o'clock at the home of the bride's parents, on West Mound street. The ceremony was performed by Rev. E. K. Johnson, of the Methodist Episcopal church, assisted by Rev. Charles V. Reeder, of Wehhsien, China, a relative of the Bales family, in the presence of about one hundred guests.

The bride was escorted and given away by her father. Her dress was ivory satin, with pearl trimmings and orange blossoms caught her long tulle veil. It was a rainbow wedding and the house was artistically profuse in roses, Canterbury bells, delphinium. The stairway was entwined with the crimson and blue ramblers and the improvised altar was arched with flowers.

With Dr. and Mrs. Bales receiving were Mr. and Mrs. Grant Deming. Mrs. Bales wore georgette of powder blue and Mrs. Deming, beige lace over georgette.

Immediately before the ceremony Miss Marjorie Sauner, of Pittsburg, sang "All For You" and "At Dawning." Miss Louise Gloystein, of Cincinnati, played the Mendelssohn march to which the bridal party entered. Dainty Jane Littleton was flower girl and Master Dick Plum, ring bearer; Mrs. Frank Kline Jr., was matron of honor; her dress was orchid georgette. The bridesmaids were Misses Martha Wilder, Mary, Alice Bales, Frances Downs and Grace Rupp. Their gowns were in the pastel colors. Miss Wilder wore lavender; Miss Bales, peach; Miss Downs, pink and Miss Rupp, blue.

Each carried a basket of flowers, the color of her dress, from which dropped ends of tulle of the respective colors; that as the young ladies passed, formed an aisle extending the entire length of the two parlors. The groom with his best man, Mr. Norman Olson, met his fair bride at the altar.

At the bride's table besides the bridal party were Mr. Frank Kline Jr. and Mr. Blenn Bales Jr. Other intimate friends of the newly wedded couple were seated around this room. A huge wedding cake adorned the center of the table, but this room needed no artificial decoration. The presence of these young people, most of them, not out of their teens, was the very essence of the rarest flower, and that is youth. The handsome, vivacious bride surrounded by a bevy of friends was life in blossom time. Could anything be more beautiful?

Guests who came from a distance were Mr. and Mrs. Grant W. Deming, Mr. Clifford Deming, Mr. Grant Deming Jr., Mr. and Mrs. B. P. Deming and daughter, Elaine, Cleveland; Mr. and Mrs. Douglas Deming, Marysville, Michigan; Mr. and Mrs. Charles Rife, Columbus; Mr. Norman Olson, Ashtabula; Mr. and Mrs. Donald Price, Paulding; Misses Marjorie Lear Ruth Leavengood, Coshocton; Miss Margaret Sauner, Pittsburg; Mr. Fred Burke and Miss Lorna Burke, Cleveland; Miss Louise Gloystein, Cincinnati; Miss Grace Rupp, West Unity; Mr. Paul Detwiler, Bellefontaine; Mr. William Ludman, Delaware.

Mr. Deming was graduated from the Ohio Wesleyan university in 1923, and is a Delta Alpha Phi. The bride, also finished her course of study at the Ohio Wesleyan university and is an honorary member of the Alpha Chi Omega. She is very popular and most of her young life has been spent in the pursuit of study.

After a trip east, Mr. and Mrs. Deming will be at home to their friends at 3333 Silsby Road, Cleveland Heights, Cleveland. The bride's going-away gown was brown silk alpaca with hat and scarf to match.

Where All Could See.

My most embarrassing moment was experienced at an evening church wedding a short time ago. As we were late, most of the seats had been taken, so it was necessary to go almost to the front pew. I sat down and calmly removed my hat, when to my mortification my escort asked if I thought I was at the movies. The hat was hurriedly adjusted, but I felt self-conscious during the entire ceremony. —Chicago Tribune.

Add to Interests

Sameness makes life monotonous. Vary your interests and you will add interest to life.

* SOCIAL CALENDAR *

The Senior-Junior commencement dance was held Friday evening at the C. A. C. gym. The dance was well patronized, a large crowd being present. The Bales-Deming wedding guests were present. They were Misses Ruth Leavengood and Marjorie Lear, of Coshocton; Miss Louise Gloystein, of Cincinnati; Miss Grace Rupp, of West Unity and Paul Detwiler, of Bellefontaine; Marion Crawford, Katharine Carmon, Margaret Zimmerman, Dick Wolf and Herbert Morris, of Lancaster; James Radcliffe, Elizabeth Black, Evan Margraff, Clyde Ferguson, Eldridge Black and Dwight Famuliner, of Kingston; "Dutch" Ludwig, Elizabeth Bonner, Jack Miller, of Chillicothe; Ruby Bell, Helen Ebert, Elliott Peters and Paul Teegardin, of Ashville; Graham Wahn, Miss Nelle Alexander, Genevieve Metzger, Elizabeth and Ann Kuhnzman, of Columbus Miss Charlotte Tisworth, of Knoxville Tennessee and James Gattrell, of Lima. Scott's orchestra of Columbus, furnished the music.

Mr. and Mrs. David C. Hornbeck, Mrs. Tabitha Yates Hunsicker and Mrs. Adrian Yates left today for Marengo, Illinois. They will motor thru and will remain to attend the wedding of Miss Esther Hornbeck to Mr. Carrolton Robb. The marriage ceremony will be solemnized Tuesday morning at the home of the bride-elect's sister, Mrs. C. J. Coarson.

Miss Martha Lewis, of Chillicothe, is the guest of Mrs. Harry S. Lewis, who will entertain in her honor this evening.

Mrs. A. Hulse Hays entertains this evening in honor of Miss Harriet Haynes of Atlanta, Georgia.

Another Kidnaping Note.
Chicago, June 21.—Chief Justice Caverly of the criminal court received another kidnaping letter, this time threatening Josephine Franks, sister of the slain Robert Franks, to which Nathan Leopold and Richard Loeb confessed. The letter is regarded by Chief Justice Caverly as the work of a crank. It was signed "George Johnson," the name used in the ransom note sent by Leopold and Loeb. It is only one of 163 letters received by Chief Justice Caverly concerning the Franks case and was turned over to the police with the others.

Two Fatally Hurt.
Orville, O., June 20.—A truck and touring car collided two miles north of here. Amos Ziegler, 53, and his wife, 55, passengers in the truck, sustained fractured skulls and are in a critical condition. Two others were injured.

Assassin Escaped.
Canton, China, June 21.—An Amantse who killed three Frenchmen and wounded 10 others by hurling into the Victoria hotel a bomb intended for Governor General Merlin of French Indo-China, is sought by Cantonese police. The bomb was thrown into the dining room during an official dinner. The governor general was uninjured. The assassin jumped into the river and escaped.

Wife of Senator Curtis Dead.
Washington, June 21.—Mrs. Charles Curtis, wife of the senator from Kansas, is dead here. She had been ill for several years, steadily losing ground. For the past few weeks she had been almost unconscious, recognizing Senator Curtis only at rare intervals.

Food Prices Decline.
Washington, June 21.—A decrease of two-tenths of 1 per cent in the retail cost of food during May as compared with April was reported by the labor department. May prices, however, were 2 per cent under prices of May a year ago. Articles which showed decreases included butter, sugar, cheese, bananas, fresh and evaporated milk, lard, bacon and oleomargarine.

Russian Ruling Blindness?
Berlin, June 21.—A message from Leningrad, Russia, declares Professor Katz has succeeded in curing blindness through the "Tiefdarrie" treatment. It states he uses warmth, electricity and radio. Sometimes he performs an operation, removing a portion of the eye and substituting artificial lenses. Thousands are said to be streaming from all parts of Russia to Katz for treatment.

Ancient Ring Dug Up
A massive neck ring of solid gold, believed by experts to date back to 120 B. C., was found on a farm in Norway. The ring, of artistic though barbarian design, has been placed in the museum of Christiania university.

Weight of Whales
Different species of whales vary greatly in size and weight. The smaller whales are known as dolphins and porpoises. Perhaps the largest species of whale is the sulphur-bottomed or blue whale. It sometimes attains 90 feet in length and 14,000 pounds in weight.

LOW SUPERINTENDENT.

Superintendent Wagner, of Oak Hill will succeed Superintendent H. B. Strawsburg as head of the New Holland school.

Superintendent Strawsburg was not a candidate for reemployment after serving five years.

TAKEN TO HOSPITAL.

Horace Weldon Gilmore, six year old son of Mr. and Mrs. Charles T. Gilmore, of South Court street, was taken to Mt. Carmel hospital, Columbus, this morning by Dr. Courtright to undergo an operation for appendicitis.

Something to Be Proud Of.

Some folks wipe the drops of sweat off their faces as if they were really ashamed of them. Man alive, drops of sweat that come from good, honest work are finer than any gems that ever sparkled in the crown of a king. And their greatest beauty is that they make the whole world happier and better. This cannot always be said of the stars on the monarch's brow.—Exchange.

Japanese Proverb

Buy land that slopes toward the center, and marry a girl whose mother is good.

MIDLAND GROCERY OUTING.

Monday morning, June 23, is the day set for the beginning of perhaps the largest and best outing ever given by the Midland Grocery Co., of Ohio. The itinerary includes many points of interest such as Philadelphia, Washington D. C., and Atlantic City. The Midland Co., has spared no expense in the preparation of entertainment in the way of contests and speakers for its guests.

Those who will enjoy the trip from this city are Miss Sophie Parks, Miss Ethel Cook, Miss May Hudnell, Miss Myrtle Hudnell, Miss Margaret Salters, Mrs. J. M. APOPLEXY

Caused Death of Mrs. John Buehler—

Funeral Services Tuesday.

Mrs. Minnie Henrietta Buehler died at her home, 423 Half avenue, Friday evening at 5 o'clock. The deceased had been ill for the past six months and her death was due to apoplexy.

She was born July 4, 1856, and had been a resident of this county 52 years.

She married John George Buehler, who died several years ago. One son and two daughters survive. They are John Buehler and Mrs. Blanche R. Mavis, of this city, and Mrs. Augusta Tobias, of Columbus and the following grandchildren; Mrs. Clarence Weidner, Mary Henrietta and Martha Jane Mavis, Clarence Weidner Jr., and the following stepchildren Mrs. K. Redwood and Mrs. Joseph Eyerman.

The funeral services will be held at her late home Tuesday afternoon, June 24, at 3 o'clock. Rev. Mr. Ferguson will officiate. Interment will be in Forest cemetery. The pallbearers will be Harrison Bartley, Ralph Long, John Bowsher, Harry Merz, Charles Hall and Sherman Binkley.

The Worm Turns.

English paper: "Wanted, a loud, second hand gramophone, for reprisals."

WOMAN'S DREAD OF ADVANCING YEARS

Pathetic, Sometimes, Are Efforts to Conceal Age.

I have yet to meet a sincere woman who will own to me that the prospect of old age has no terrors for her. writes the Hon. Mrs. John Fortescue in the London Mail. Some women dread the inevitable loss of beauty and its attendant power; others the decrease of vitality and desire for enjoyment; while the unselfish woman fears only to become a burden upon those she loves.

But the woman who tries with transparent artifice to deceive herself and the world as to her age is to my mind the most pitiful figure in the universe. We have all seen her—the absurd though pathetic doll woman who wears in the summer youthful hats of lace with cherries bobbing over one eye or ear, and little, short, sleeveless chemise frocks more suitable for her daughter of nineteen. Often she will carry a miniature parasol or be leading a toy Pomeranian dog with a large, pale blue ribbon bow on his collar.

By her side occasionally walks her youngest daughter, a miserably self-conscious, gawky child of twelve or thirteen years, dressed to look as though she were still in the nursery. The poor child is made the victim of her mother's vanity in the hope of deluding the beholder into the belief that both she and her mother are younger than they are.

The effort of some mothers to appear younger than they are is sometimes due to quite a laudable motive. They think that by accompanying their daughters around and joining actively in the round of gaiety and entertainments they will retain their influence over their children and share their confidence. Personally, I think this is a mistaken idea. It is the looker-on, not the player, who sees most of the game and whose judgment is therefore of far greater value.

In the professional world, of course, it becomes absolutely necessary for both men and women to appear as young as they possibly can—for engagements of all kinds are given in preference to youth. A curious and pathetic fact illustrates this. The immediate result of the passing of the employers' liability act was that the supply of cheap hair dye in England ran out! Until the insurance companies issued policies covering all risks to employees no employer would engage any but youthful applicants; and therefore it became necessary for all applicants to appear youthful.

But how beautiful it is to watch a woman of leisure growing old gracefully. Some there are whose spirit is so brave and joyous, whose capacity for entering into the happiness and interests of those around them—particularly of the younger generation—is so great that they seem to capture the youth as well as the love and confidence of the young people with whom they come in contact. And then what matter white hairs, a vague figure, and a few wrinkles if the eyes are bright and laughing, the mind alert and the heart full of joy, sympathy and contentment.

Takes Messages on Fly

The British air service in Mesopotamia has perfected a scheme for delivering written messages to planes without the necessity of their landing and stopping to pick up the documents.

A line is stretched between two poles about 6 feet high and perhaps 20 feet apart. To this line the message is tied. By spreading large pieces of cloth on the ground in a prearranged pattern the pilot of the aircraft is signaled that there is a message for him; the arrangement of the cloth also indicates in what direction he must fly to cross the line between the poles at right angles. If more than one plane is up, the cloth again tells which plane is to receive the message.

The selected plane swoops low over the poles, and the pilot dangles a line to the end of which is attached a hook. This engages the line to which the message is tied, and line, message and all are dragged into the air. The pilot reels in his catch as the plane speeds away. If the message is to be delivered the plane simply dives to the point of delivery and drops the message.

The pilots have become very expert at picking up and dropping messages in this fashion.

Exit the Man

Despite the fact that leap year is well under way and eligible women should be looking about for prospective matches, a clerk in the Juvenile court the other day flatly turned down an offer for a husband.

A woman who comes in regularly to elicit alimony, and who is slightly deaf recently asked: "Why don't you get married?" When informed that it was the lack of a man she said that she would obtain one. A few days ago she returned and announced: "Well, I've got you a man."

The man, who was anxiously waiting in the corridor, departed hastily, however, when the clerk exclaimed: "I don't want him."—Indianapolis News.

Her Idea of Mother

Emily Ann, age four, and her sister, scarcely two years her senior, were playing in the front room.

"Now, Emily," chided Jean, "don't get against that fern any more. You'll make it turn brown and it will die."

Emily looked at her sister with disgust and scornfully said, "Aw, you're not my mother."

MARRIAGE VOWS TAKEN

Miss Elizabeth Alice Bales is Bride of Mr. Barton Ruffell Deming.

Ceremony Was Performed by Rev. Edwin K. Johnson, Assisted by Rev. Charles V. Reeder at Home of Bride's Parents, Dr. and Mrs. Blenn R. Bales.

Miss Elizabeth Alice Bales, only daughter of Dr. and Mrs. Blenn Rife Bales, was married to Mr. Barton Ruffell Deming, son of Mr. and Mrs. Grant Deming, of Cleveland, Friday evening at six o'clock at the home of the bride's parents, on West Mound street. The ceremony was performed by Rev. E. K. Johnson, of the Methodist Episcopal church, assisted by Rev. Charles V. Reeder, of Weithsien, China, a relative of the Bales family, in the presence of about one hundred guests. The bride was escorted and given away by her father. Her dress was ivory satin, with pearl trimmings and orange blossoms caught her long tulle veil. It was a rainbow wedding and the house was artistically profuse in roses, Canterbury bells, delphinium. The stairway was entwined with the crimson and blue ramblers and the improvised altar was arched with flowers.

With Dr. and Mrs. Bales receiving were Mr. and Mrs. Grant Deming. Mrs. Bales wore georgette of powder blue and Mrs. Deming, beige lace over georgette.

Immediately before the ceremony Miss Marjorie Sauner, of Pittsburg, sang "All For You" and "At Dawning." Miss Louise Gloystein, of Cincinnati, played the Mendelssohn march to which the bridal party entered. Dainty Jane Littleton was flower girl and Master Dick Plum, ring bearer; Mrs. Frank Kline Jr., was matron of honor; her dress was orchid georgette. The bridesmaids were Misses Martha Wilder, Mary Alice Bales, Frances Downs and Grace Rupp. Their gowns were in the pastel colors. Miss Wilder wore lavender; Miss Bales, peach; Miss Downs, pink and Miss Rupp, blue. Each carried a basket of flowers, the color of her dress, from which dropped ends of tulle of the respective colors; that as the young ladies passed, formed an aisle extending the entire length of the two parlors. The groom with his best man, Mr. Norman Olson, met his fair bride at the altar.

At the bride's table besides the bridal party were Mr. Frank Kline Jr. and Mr. Blenn Bales Jr. Other intimate friends of the newly wedded couple were seated around this room. A huge wedding cake adorned the center of the table, but this room needed no artificial decoration. The presence of these young people, most of them, not out of their teens, was the very essence of the rarest flower, and that is youth.

The handsome, vivacious bride surrounded by a bevy of friends was life in blossom time. Could anything be more beautiful?

Guests who came from a distance were Mr. and Mrs. Grant W. Deming, Mr. Clifford Deming, Mr. Grant Deming Jr., Mr. and Mrs. B. P. Deming and daughter, Elaine, Cleveland; Mr. and Mrs. Douglas Deming, Marysville, Michigan; Mr. and Mrs. Charles Rife, Columbus; Mr. Norman Olson, Ashtabula; Mr. and Mrs. Donald Price, Paulding; Misses Marjorie Lear Ruth Leavengood, Coshocton; Miss Margaret Sauner, Pittsburg; Mr. Fred Burke and Miss Lorna Burke, Cleveland; Miss Louise Gloystein, Cincinnati; Miss Grace Rupp, West Unity; Mr. Paul Detwiler, Bellefontaine; Mr. William Ludman, Delaware.

Mr. Deming was graduated from the Ohio Wesleyan university in 1923, and is a Delta Alpha Phi. The bride, also finished her course of study at the Ohio Wesleyan university and is an honorary member of the Alpha Chi Omega. She is very popular and most of her young life has been spent in the pursuit of study.

After a trip east, Mr. and Mrs. Deming will be at home to their friends at 3333 Silsby Road, Cleveland Heights, Cleveland. The bride's going-away gown was brown silk alpaca with hat and scarf to match.

Where All Could See.

My most embarrassing moment was experienced at an evening church wedding a short time ago. As we were late, most of the seats had been taken, so it was necessary to go almost to the front pew. I sat down and calmly removed my hat, when to my mortification my escort asked if I thought I was at the movies. The hat was hurriedly adjusted, but I felt self-conscious during the entire ceremony.

—Chicago Tribune.

Add to Interests

Sameness makes life monotonous. Vary your interests and you will add interest to life.

SOCIAL CALENDAR

The Senior-Junior commencement dance was held Friday evening at the C. A. C. gym. The dance was well patronized, a large crowd being present. The Bales-Deming wedding guests were present. They were Misses Ruth Leavengood and Marjorie Lear, of Coshocton; Miss Louise Gloystein, of Cincinnati; Miss Grace Rupp, of West Unity and Paul Detwiler, of Bellefontaine; Marion Crawford, Katharine Carmon, Margaret Zimmerman, Dick Wolf and Herbert Morris, of Lancaster; James Radcliffe, Elizabeth Black, Evan Margraff, Clyde Ferguson, Eldridge Black and Dwight Famuliner, of Kingston; "Dutch" Ludwig, Elizabeth Bonner, Jack Miller, of Chillicothe; Ruby Bell, Helen Ebert, Elliott Peters and Paul Teegardin, of Ashville; Graham Wahn, Miss Nelle Alexander, Genevieve Metzger, Elizabeth and Ann Kuhnzman, of Columbus; Miss Charlotte Tittsworth, of Knoxville Tennessee and James Gattrell, of Lima. Scott's orchestra of Columbus, furnished the music.

Mr. and Mrs. David C. Hornbeck, Mrs. Tabitha Yates Hunsicker and Mrs. Adrian Yates left today for Marengo, Illinois. They will motor thru and will remain to attend the wedding of Miss Esther Hornbeck to Mr. Carrolton Robb. The marriage ceremony will be solemnized Tuesday morning at the home of the bride-elect's sister, Mrs. C. J. Coarson.

Miss Martha Lewis, of Chillicothe, is the guest of Mrs. Harry S. Lewis, who will entertain in her honor this evening.

Mrs. A. Hulse Hays entertains this evening in honor of Miss Harriet Haynes of Atlanta, Georgia.

Another Kidnaping Note.

Chicago, June 21.—Chief Justice Caverly of the criminal court received another kidnaping letter, this time threatening Josephine Franks, sister of the slain Robert Franks, to which Nathan Leopold and Richard Loeb confessed. The letter is regarded by Chief Justice Caverly as the work of a crank. It was signed "George Johnson," the name used in the ransom note sent by Leopold and Loeb. It is only one of 160 letters received by Chief Justice Caverly concerning the Franks case and was turned over to the police with the others.

Two Fatally Hurt.

Orrville, O., June 20.—A truck and touring car collided two miles north of here. Amos Ziegler, 53, and his wife, 55, passengers in the truck, sustained fractured skulls and are in a critical condition. Two others were injured.

Assassin Escaped.

Canton, China, June 21.—An Amante who killed three Frenchmen and wounded 10 others by hurling into the Victoria hotel a bomb intended for Governor General Merlin of French Indo-China, is sought by Cantonese police. The bomb was thrown into the dining room during an official dinner. The governor general was uninjured. The assassin jumped into the river and escaped.

Wife of Senator Curtis Dead.

Washington, June 21.—Mrs. Charles Curtis, wife of the senator from Kansas, is dead here. She had been ill for several years, steadily losing ground. For the past few weeks she had been almost unconscious, recognizing Senator Curtis only at rare intervals.

Food Prices Decline.

Washington, June 21.—A decrease of two-tenths of 1 per cent in the retail cost of food during May as compared with April was reported by the labor department. May prices, however, were 2 per cent under prices of May a year ago. Articles which showed decreases included butter, sugar, cheese, bananas, fresh and evaporated milk, lard, bacon and oleomargarine.

Russian Ruling Blindness?

Berlin, June 21.—A message from Leningrad, Russia, declares Professor Katz has succeeded in curing blindness through the "Tiediatric" treatment. It states he uses warmth, electricity and radio. Sometimes he performs an operation, removing a portion of the eye and substituting artificial lenses. Thousands are said to be streaming from all parts of Russia to Katz for treatment.

Ancient Ring Dug Up

A massive neck ring of solid gold, believed by experts to date back to 120 B. C., was found on a farm in Norway. The ring, of artistic though barbarian design, has been placed in the museum of Christiania university.

Weight of Whales

Different species of whales vary greatly in size and weight. The smaller whales are known as dolphins and porpoises. Perhaps the largest species of whale is the sulphur-bottomed or blue whale. It sometimes attains 90 feet in length and 14,000 pounds in weight.

LW SUPERINTENDENT.

Superintendent Wagner, of Oak Hill will succeed Superintendent H. B. Strawsburg as head of the New Holland school.

Superintendent Strawsburg was not a candidate for reemployment after serving five years.

TAKEN TO HOSPITAL.

Horace Weldon Gilmore, six year old son of Mr. and Mrs. Charles T. Gilmore, of South Court street, was taken to Mt. Carmel hospital, Columbus, this morning by Dr. Courtright to undergo an operation for appendicitis.

Something to Be Proud Of.

Some folks wipe the drops of sweat off their faces as if they were really ashamed of them. Man alive, drops of sweat that come from good, honest work are finer than any gems that ever sparkled in the crown of a king. And their greatest beauty is that they make the whole world happier and better. This cannot always be said of the stars on the monarch's brow.—Exchange.

Japanese Proverb

Buy land that slopes toward the center, and marry a girl whose mother is good.

MIDLAND GROCERY OUTING.

Monday morning, June 23, is the day set for the beginning of perhaps the largest and best outing ever given by the Midland Grocery Co., of Ohio. The itinerary includes many points of interest such as Philadelphia, Washington D. C., and Atlantic City. The Midland Co., has spared no expense in the preparation of entertainment in the way of contests and speakers for its guests.

Those who will enjoy the trip from this city are Miss Sophie Parks, Miss Ethel Cook, Miss May Hudnell, Miss Myrtle Hudnell, Miss Margaret Salters, Mrs. J. M. Newland, Mrs. Albert Parks, Mrs. Sophie Smith, Mrs. Ellen Root, Mr. and Mrs. H. E. Betz, Mr. and Mrs. H. E. Mowery, Mr. Roy Henn and Mr. G. F. Grand-Girard.

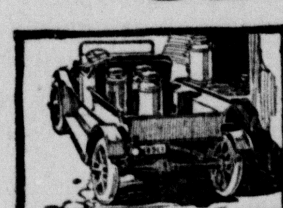

Optimistic Thought.

All human treasures are contained in a virtuous life.

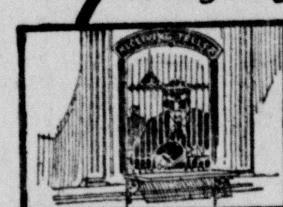

CANNING SEASON.

Fruit jars, stoneware, kettles, jar rubbers, everything for canning. HAMILTON'S STORE. 20 June 22.

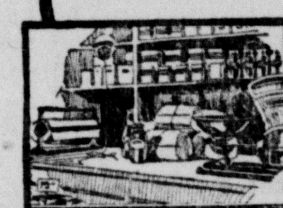

Two Streams of Profit

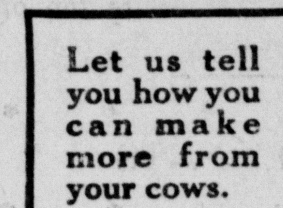

Cash Income every day

Bank Account

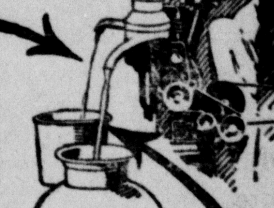

Buying Power

Let us tell you how you can make more from your cows.

The minute you start using a De Laval you get something to sell for cash—cream; and in addition you get skim-milk to grow into another crop of calves, pigs and chickens. Two sources of profit, and a steady cash income every day.

This is the surest, safest and most profitable way of farming—and the De Laval Separator makes it possible. It is the original separator, skims cleaner, lasts longer, turns easier than any other. There are over 2,500,000 De Laval Separators in use the world over—about as many as all the rest put together. The De Laval has always led in every important separator improvement.

SAFETY OF SHIPS UP TO U. S. AGENCY

Work of Coast and Geodetic Survey Outlined

"The recent groundings of the world's two biggest ocean liners, the Leviathan and the Majestic, show how essential to the safety of the world's shipping is an intimate knowledge of the complicated tidal and current fluctuations of the world's great harbors," says a bulletin of the National Geographic society, issued from its Washington (D. C.), headquarters, "and emphasizes the importance of one of the phases of the work of the United States coast and geodetic survey."

"New York harbor is not a single waterway, but a series of communicating ones, with two entrances from the sea. A territory larger than Massachusetts, Connecticut and Rhode Island together, drains into the Atlantic through three bays, four straits, and one great and several small tidal rivers. The fresh water from this large area complicates the problem of giving the navigator definite data as to flood and ebb and current so that he may safely maneuver his craft at all times."

Aids Navigation and Sewage.

"The United States coast and geodetic survey has given navigators a definite picture of the conditions they must meet in berthing their great liners; to wharf engineers the information necessary to the proper arrangement of docking facilities; and to sanitary engineers new and basic data that has an important bearing on the problem of sewage disposal."

"Working quietly on the great fundamental problems of navigation, the coast and geodetic survey doesn't make much copy, and the world at large hears comparatively little of one of the most highly technical of the scientific bureaus of the United States government."

"And yet every ship that sails the seas, every passenger that comes into port, every article on the supercargo's manifest are served in a very concrete, it unsuspected, way by the survey."

"Two things the navigator must have if he is to bring his craft with its human and material cargo safely into port—a knowledge of the tricks of the compass and a picture of the channel and harbor conditions."

Vagaries of a Compass Needle.

"The needle of the mariner's compass has been shown to be as full of vagaries as mid-March weather. Men used to think that it could always be depended upon to point to the magnetic pole. But local affinities distract it from its proper affection in ways that are sometimes startling. If the sailor has a sweetheart in every port, the magnetic needle has a secondary attraction in many quarters. Looking at a magnetic declination chart we see deeply waved curves which proclaim loudly the influence of these affinities in weaning the needle away from the 'straight and narrow' of its true direction. Magnetic surveys on the sea in general and along the coast in particular, are a supreme necessity in the accurate guidance of ships over the trackless ocean and into the world's ports."

"Examining the line of the 15 degree west declination we find it sweeping over the sea in a northwesterly direction, with comparatively small variations from normalcy until it approaches the north shore of Massachusetts. There it swings radically to the west, and as land is reached swings back until it points almost due northeast at more than a right angle to its recent position as it rounds the Cape Ann peninsula."

Goes on 'Spree' in New York.

"The same condition obtains in the 10 degree west declination which sweeps over the Atlantic toward New York. Approaching the waters between Long Island and Sandy Hook the needle adheres closely to its proper direction. But when it reaches the Hudson river it is pulled around until it seems to forget all about its fundamental affection and goes on a lark that causes it to swing around through almost or quite a quarter circle from its accustomed position."

"No wonder a magnetic survey is needed to warn the mariner of the vagaries of the magnetic needle when it permits itself to fall so fully under the spell of the Great White way that it wanders 90 degrees away from its path of solar duty."

"The need of more thorough soundings in harbors and on rocky coasts grows greater as the volume and complexity of shipping grows and the size of craft increases."

"Soundings made with lead lines can be depended on to discover the main underwater elevations, but the waters off the New England shores, the Pacific shores and Alaska abound in pinnacle rocks—Washington monuments of the sea. They rise to sharp points almost to the surface, which deflect a lead line, even though the lead may, on a slender chance, land on top of them."

"Thus it came to be that they passed undiscovered and uncharted until some ship chanced to run afoul of one of them, as the U. S. cruiser Brooklyn did in the harbor of New Bedford, Mass."

How Wire Drag Is Used

"Latterly a wire drag has been evolved. It is stretched between run launches or other boats which run parallel to one another anywhere from 100 to 25,000 feet apart."

"The lower wire sweeps through the water at a depth well below the keels

of ships of the deepest drafts and any obstacle that rises above that depth is readily detected. A shipping of immense volume moves through the pinnacle and boulder-infested waters of the New England coast and the survey is working aggressively with the limited funds at its disposal to finish its sweeping of these waters and to discover all such obstructions to navigation before they register their presence by tearing holes into the hulls of hapless liners."

"Mud banks and sand bars must also be watched carefully; for the unceasing attack by winds, waves, and currents upon the shore cause, particularly in stormy weather, the water to be converted into a sort of huge mill in which the material wrested loose from its position is ground to sand and deposited elsewhere, filling up channels and obstructing navigation generally."

"Automobiles and motor-boats have made heretofore inaccessible shores teem with the activities of civilization, and now knowledge of the laws of such shore evolution must be mastered and remedies found for conditions of erosion that menace life and property in the seaside communities."

"And so it happens that the coast and geodetic survey under the direction of Col. E. Lester Jones, must ever be on the alert to protect shipping from the perils of demoralized magnetic needles and changing shallow water conditions."

Completes 35 Years' Service for Uncle Sam

Rush D. Simmons started at the bottom of the Post Office department ladder in Washington 35 years ago. He has worked in almost every branch of the department and today holds the position of chief inspector.

Hound Loses Paw After Being Caught in Trap

Betty, a blue ribbon foxhound owned by James Wright of North Andover, Mass., will wear a cork leg for the remainder of her days. Her right forepaw was amputated by Dr. William H. Ziminness, city veterinarian, to save the animal's life from blood poisoning, caused by being caught in a fox trap a few days ago.

For two days and nights, with temperature from 12 to 18 degrees below zero, Betty suffered in the trap, and when found the injured foot was frozen. Her father, Sport, lost his life two years ago while on the trail by falling into an abandoned cellar. When found 15 days later, he was dead.

Rats Tunnel Fairways of Potomac Park Links

Rats burrowing through the earth under the East Potomac park golf course at Washington have made so many depressions in the grassy fairways that 1,000 cubic yards of soil were used in filling the holes, S. G. Loeffler, Jr., who is in charge of the course, said recently. Replacing of the turf has been necessitated in many places, especially near the Washington channel side of the course, he said.

It had been planned, Mr. Loeffler said, to reopen the course about the middle of this month, but extensive improvements and repairs will probably cause a delay.

Wills Widower \$100,000 if He Remains Single

The will of Mrs. Louisa P. Johnson, probated at Philadelphia, leaves to her son-in-law, Rufus King Tennig, of Andalusia, Pa., a trust fund of \$100,000 providing he does not remarry.

Mr. Tennig is fifty, and a widower, with three daughters. According to his brother, Frederick, he has no intention of remarrying.

A second trust fund of like amount is left to Mr. Tennig's daughters, who are to receive his trust fund also should he decide to remarry.

Pays After 60 Years

Found—the truly honest man. Mrs. Badger of West Quincy, Miss., received through the mail a check for \$200.00 with a note of explanation reading, in substance: "Borrowed \$5 from you husband 60 years ago to buy a bow and arrow. I moved West and have never repaid the loan. The enclosed check is for the amount due, plus interest."

Fighting Frost in California.

Frost prevention is an ever-present problem with the orange growers of California. A dependable system of frost prevention would be of immense value to them. Recently a system has been developed which shows great promise. The plant consists of a central heating furnace. Oil is fed under pressure from a supply tank to the burners by a small motor. A thirty-horse power motor is attached to a blower which draws the air into the heating chamber and forces it out through the distributing pipes. These pipes are of concrete, varying in size from ten inches at the furnace down to three inches at the point of delivery. Vertical galvanized pipes with distributing caps deliver a stream of hot air directly under each group of four trees. The temperature of the air at the point of delivery is approximately 400 degrees Fahrenheit, and dampers control the amount of air delivered. The inventor claims that his equipment can displace the cold air in an orchard with warm air to a height of ten feet in about fifteen minutes.

Portable Concrete Safes.

Portable safes made of concrete without any iron or steel outside casing, are now in use in Germany, and are also being exported. These small safes are said to possess all the advantages in respect to their fireproof and insulating qualities that are possessed by large concrete vaults. Securely connected to an iron base are four upright corner pieces formed of rectangular iron plates stiffened with angle irons. These meet at the center of each side of the safe, and form continuous walls. Inside these walls similar corner pieces, secured to the base, form the interior lining of the safe. The space between these two iron walls is filled with reinforcing rods of various kinds. The concrete is poured so as to form a monolithic structure with outside concrete walls.

London Mayors.

The new lord mayor, who was recently installed into office, is the 733d mayor that London has had, for the first mayor of London was appointed in the year 1189. From time immemorial the holder of this office has been called "lord mayor," and since 1354 he has been a "right honorable." He ranks as an earl, and is the representative of royalty in the civil government of the city.

BINDER FOR SALE.

McCormick binder for sale, in good condition. Cheap if sold at once.

Answers Any Question

A new concern in New York city, which undertakes to answer by telephone any reasonable question on any subject whatever, finds that they can answer eighty per cent of all questions in two minutes. If the answer requires longer time they take the patron's telephone number and call him back. The service is rendered for a fixed price a year, the subscriber receiving a code name. He can telephone at any hour of the day or night and be answered.

Lives on Being Photographed

At Capri there is a white-haired "fisherman" who haunts the landing where tourists disembark. This fisherman has not cast a net or line for many years, owing to the demands of tourists for poses—which requests he graciously grants for a small consideration. These requests have been so numerous that this old man has found it more profitable to grant tourists' requests than to go out fishing.—Mentor Magazine.

Modern Melodrama

Almost any day now one may expect to see a melodrama in which the hero, baffled for two acts, finally rushes on the stage at the last moment in the third act with the money necessary to pay off the mortgage on the car.

Don't forget those drapes that need cleaning. Why worry. Call Barnhill's.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

DON'T FORGET

DRESSES, SUITS, COATS CLEANED AND PRESSED. GUARANTEED SATISFACTORY.

MACK PARRETT

SAFETY OF SHIPS UP TO U. S. AGENCY

Work of Coast and Geodetic Survey Outlined

"The recent groundings of the world's two biggest ocean liners, the Leviathan and the Majestic, show how essential to the safety of the world's shipping is an intimate knowledge of the complicated tidal and current fluctuations of the world's great harbors," says a bulletin of the National Geographic society, issued from its Washington (D. C.), headquarters, "and emphasizes the importance of one of the phases of the work of the United States coast and geodetic survey."

"New York harbor is not a single waterway, but a series of communicating ones, with two entrances from the sea. A territory larger than Massachusetts, Connecticut and Rhode Island together, drains into the Atlantic through three bays, four straits, and one great and several small tidal rivers. The fresh water from this large area complicates the problem of giving the navigator definite data as to flood and ebb and current so that he may safely maneuver his craft at all times."

Aids Navigation and Sewage.

"The United States coast and geodetic survey has given navigators a definite picture of the conditions they must meet in berthing their great liners; to wharf engineers the information necessary to the proper arrangement of docking facilities; and to sanitary engineers new and basic data that has an important bearing on the problem of sewage disposal."

"Working quietly on the great fundamental problems of navigation, the coast and geodetic survey doesn't make much copy, and the world at large hears comparatively little of one of the most highly technical of the scientific bureaus of the United States government."

"And yet every ship that sails the seas, every passenger that comes into port, every article on the supercargo's manifest are served in a very concrete, it unsuspected, way by the survey."

"Two things the navigator must have if he is to bring his craft with its human and material cargo safely into port—a knowledge of the tricks of the compass and a picture of channel and harbor conditions."

Vagaries of a Compass Needle.

"The needle of the mariner's compass has been shown to be as full of vagaries as mid-March weather. Men used to think that it could always be depended upon to point to the magnetic pole. But local affinities distract it from its proper affection in ways that are sometimes startling. If the sailor has a sweetheart in every port, the magnetic needle has a secondary attraction in many quarters. Looking at a magnetic declination chart we see deeply waved curves which proclaim loudly the influence of these affinities in weaving the needle away from the 'straight and narrow' of its true direction. Magnetic surveys on the sea in general and along the coast in particular, are a supreme necessity in the accurate guidance of ships over the trackless ocean and into the world's ports."

"Examining the line of the 15 degree west declination we find it sweeping over the sea in a northwesterly direction, with comparatively small variations from normalcy until it approaches the north shore of Massachusetts. There it swings radically to the west, and as land is reached swings back until it points almost due northeast at more than a right angle to its recent position as it rounds the Cape Ann peninsula."

Goes on 'Spree' in New York.

"The same condition obtains in the 10 degree west declination which sweeps over the Atlantic toward New York. Approaching the waters between Long Island and Sandy Hook the needle adheres closely to its proper direction. But when it reaches the Hudson river it is pulled around until it seems to forget all about its fundamental affection and goes on a lark that causes it to swing around through almost or quite a quarter circle from its accustomed position."

"No wonder a magnetic survey is needed to warn the mariner of the vagaries of the magnetic needle when it permits itself to fall so fully under the spell of the Great White way that it wanders 90 degrees away from its path of solar duty."

"The need of more thorough soundings in harbors and on rocky coasts grows greater as the volume and complexity of shipping grows and the size of craft increases."

"Soundings made with lead lines can be depended on to discover the main underwater elevations, but the waters off the New England shores, the Pacific shores and Alaska abound in pinnacle rocks—Washington monuments of the sea. They rise to sharp points almost to the surface, which deflect a lead line, even though the lead may, on a slender chance, land on top of them."

"Thus it came to be that they passed undiscovered and uncharted until some ship chanced to run afoul of one of them, as the U. S. cruiser Brooklyn did in the harbor of New Bedford, Mass."

How Wire Drag Is Used

"Latterly a wire drag has been evolved. It is stretched between two launches or other boats which run parallel to one another anywhere from 100 to 25,000 feet apart."

"The lower wire sweeps through the water at a depth well below the keels

of ships of the deepest drafts and any obstacle that rises above that depth is readily detected. A shipping of immense volume moves through the pinnacle and boulder-infested waters of the New England coast and the survey is working aggressively with the limited funds at its disposal to finish its sweeping of these waters and to discover all such obstructions to navigation before they register their presence by tearing holes into the hulls of hapless liners."

"Mud banks and sand bars must also be watched carefully; for the unceasing attack by winds, waves, and currents upon the shore cause, particularly in stormy weather, the water to be converted into a sort of huge mill in which the material wrested loose from its position is ground to sand and deposited elsewhere, filling up channels and obstructing navigation generally."

"Automobiles and motor-boats have made heretofore inaccessible shores teem with the activities of civilization, and now knowledge of the laws of such shore evolution must be mastered and remedies found for conditions of erosion that menace life and property in the seaside communities."

"And so it happens that the coast and geodetic survey under the direction of Col. E. Lester Jones, must ever be on the alert to protect shipping from the perils of demoralized magnetic needles and changing shallow water conditions."

Completes 35 Years' Service for Uncle Sam

Rush D. Simmons started at the bottom of the Post Office department ladder in Washington 35 years ago. He has worked in almost every branch of the department and today holds the position of chief inspector.

Hound Loses Paw After Being Caught in Trap

Betty, a blue ribbon foxhound owned by James Wright of North Andover, Mass., will wear a cork leg for the remainder of her days. Her right forepaw was amputated by Dr. William H. Zimminess, city veterinarian, to save the animal's life from blood poison, caused by being caught in a fox trap a few days ago.

For two days and nights, with temperature from 12 to 18 degrees below zero, Betty suffered in the trap, and when found the injured foot was frozen. Her father, Sport, lost his life two years ago while on the trail by falling into an abandoned cellar. When found 15 days later, he was dead.

Rats Tunnel Fairways of Potomac Park Links

Rats burrowing through the earth under the East Potomac park golf course at Washington have made so many depressions in the grassy fairways that 1,000 cubic yards of soil were used in filling the holes, S. G. Loeffler, Jr., who is in charge of the course, said recently. Replacing of the turf has been necessitated in many places, especially near the Washington channel side of the course, he said.

It had been planned, Mr. Loeffler said, to reopen the course about the middle of this month, but extensive improvements and repairs will probably cause a delay.

Wills Widower \$100,000 if He Remains Single

The will of Mrs. Louisa P. Johnson, probated at Philadelphia, leaves to her son-in-law, Rufus King Tennig, of Andalusia, Pa., a trust fund of \$100,000 providing he does not remarry.

Mr. Tennig is fifty, and a widower, with three daughters. According to his brother, Frederick, he has no intention of remarrying.

A second trust fund of like amount is left to Mr. Tennig's daughters, who are to receive his trust fund also should he decide to remarry.

Pays After 60 Years

Found—the truly honest man. Mrs. Badger of West Quincy, Miss., received through the mail a check for \$20.68 with a note of explanation reading, in substance: "Borrowed \$5 from your husband 60 years ago to buy a box and arrow. I moved West and have never repaid the loan. The enclosed check is for the amount due, plus interest."

Fighting Frost in California.

Frost prevention is an ever-present problem with the orange growers of California. A dependable system of frost prevention would be of immense value to them. Recently a system has been developed which shows great promise. The plant consists of a central heating furnace. Oil is fed under pressure from a supply tank to the burners by a small motor. A thirty-horse power motor is attached to a blower which draws the air into the heating chamber and forces it out through the distributing pipes. These pipes are of concrete, varying in size from ten inches at the furnace down to three inches at the point of delivery. Vertical galvanized pipes with distributing caps deliver a stream of hot air directly under each group of four trees. The temperature of the air at the point of delivery is approximately 400 degrees Fahrenheit, and dampers control the amount of air delivered. The inventor claims that his equipment can displace the cold air in an orchard with warm air to a height of ten feet in about fifteen minutes.

Portable Concrete Safes.

Portable safes made of concrete without any iron or steel outside casing, are now in use in Germany, and are also being exported. These small safes are said to possess all the advantages in respect to their fireproof and insulating qualities that are possessed by large concrete vaults. Securely connected to an iron base are four upright corner pieces formed of rectangular iron plates stiffened with angle irons. These meet at the center of each side of the safe, and form continuous walls. Inside these walls similar corner pieces, secured to the base, form the interior lining of the safe. The space between these two iron walls is filled with reinforcing rods of various kinds. The concrete is poured so as to form a monolithic structure with outside concrete walls.

London Mayors.

The new lord mayor, who was recently installed into office, is the 733d mayor that London has had, for the first mayor of London was appointed in the year 1189. From time immemorial the holder of this office has been called "lord mayor," and since 1354 he has been a "right honorable." He ranks as an earl, and is the representative of royalty in the civil government of the city.

BINDER FOR SALE.

McCormick Binder for sale, in good condition. Cheap if sold at once. H. H. Bumgarner R. F. D. 3, Circleville, Ohio. 16juned6.

CHOICE CHERRIES FOR CANNING.

Buttercup cherries will be in the market while the season last. Telephone orders to 174 or 199. 17juned5.

CLEARANCE SALE OF HATS.

All reduced to \$5 regardless of former prices. All colors, all styles. Graham's Millinery & Corset Shop. 16juned6.

16 TO 1.

We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscription to either Daily or Weekly Union-Herald.

PUBLIC SALE.

The next big Aer-O-Plane sale will be held at Henn's Meat Market on West Main street, Saturday afternoon, June 28, at 2 o'clock.

Now is the time to get your bonds. Remember, the Union-Herald gives \$16 in bonds for every \$1 paid on subscription to either Daily or Weekly. Send in your subscription or renewal now and get in on this sale.

FINE COUNTRY HOME FOR SALE.

335 acre tract with a nice cozy, modern brick dwelling; two good barns and other buildings, including scales and scale house. It has a very fine orchard. All land can be cultivated with a natural drainage; located along Scippo creek and the state highway, in the heart of our famous Pickaway Plains, known as the Daniel Hitler homestead, and is counted the finest farm in Pickaway county. It is located not far from school and market. Owner wishes to retire from the farm as he has other business interests requiring his attention, therefore we are offering this beautiful place at a sacrifice price for a short time. For price and terms, call or write, A. W. Phillips, or Circle Realty Co., Circleville, O.

PUBLIC SALE.

On Wednesday, June 25, 1924, at 10 o'clock p. m., the blacksmith tools and household goods of the late Charles Schwarz will be sold at public sale from the blacksmith shop, 201 South Pickaway street, Circleville, Ohio. Among the things sold will be two anvils, two vises, emery wheel stand, 5 h. p. gasoline engine, electric forge blower, combination range, dishes, two couches, dining room table and chairs and numerous other articles. Terms: Cash on day of sale. C. C. Schwarz. Emanuel Dresbach, Auctioneer. 18juned6.

Answers Any Question

A new concern in New York city, which undertakes to answer by telephone any reasonable question on any subject whatever, finds that they can answer eighty per cent of all questions in two minutes. If the answer requires longer time they take the patron's telephone number and call him back. The service is rendered for a fixed price a year, the subscriber receiving a code name. He can telephone at any hour of the day or night and be answered.

Lives on Being Photographed

At Capri there is a white-haired "fisherman" who haunts the landing where tourists disembark. This fisherman has not cast a net or line for many years, owing to the demands of tourists for poses—which requests he graciously grants for a small consideration. These requests have been so numerous that this old man has found it more profitable to grant tourists' requests than to go out fishing.—Mentor Magazine.

Modern Melodrama

Almost any day now one may expect to see a melodrama in which the hero, baffled for two acts, finally rushes on the stage at the last moment in the third act with the money necessary to pay off the mortgage on the car.

Don't forget those drapes that need cleaning. Why worry. Call Barnhill's.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

DON'T FORGET DRESSES, SUITS, COATS CLEANED AND PRESSED. GUARANTEED SATISFACTORY. GEO. W. LITTLETON.

Americans Are Largest Chair Users of World

Americans are becoming the biggest chair users among nations, says a bulletin of the national foreign trade council.
Like its user, the American chair is constantly on the move, and to make it strong enough to withstand his fidgeting, this chair now passes through 86 operations in its building. More care is taken with it than any other piece of furniture we make.
The chair, commonly regarded as stationary, may travel thousands of miles and meet many adventures in its lifetime, according to the national foreign trade council, which has taken the chair as an astonishing illustration of the international character of trade.

Two chairs that do not travel are St. Peter's chair at Rome, dating from the Sixth century, the most famous of ancient chairs; and the world's largest chair, placed as a monument near the railway station at Gardner, Mass.
The number of old and new chairs in the United States is estimated at upwards of 700,000,000, with three to four million annually manufactured. We are more favored than the European peoples of before the Sixteenth century; until that time chairs were used only by kings or the nobility, and common people stood or sat on the floor.

The ancient chair was built of heavy carved and gilded woods, and covered with costly stuffs. The Egyptian chairs were often made of ebony and ivory. Little used or moved, they lasted.

Taking its average life at ten years, and considering its daily shiftings by a lively people, the travels of the American chair in the home or office have been counted at a minimum of 130 miles. Its movings to other houses or offices, or to other vicinities, add many more miles. The travels of an American rocking chair have been placed at 442 miles. The lazy rocker, however, is passing out of use.

Wood "Wool" House Lining

Household fuel bills can be cut from a quarter to a third, it is claimed, by insulating the walls of the home with a fireproof "wool" made from waste lumber. The material is said to be almost as effective an insulator as pure wool, which, of course, is too costly for building purposes.

The insulator is a flexible blanket made of spruce lumber waste cemented together and packed between two sheets of asphalt-lined, tough waterproof paper. The waste is chemically fireproofed first, and then dried by fans and steam pipes. Next it is ground by machines, cemented, and, after drying, is packed between the paper sheets. The finished product is said to be light, flexible, and easy to apply and to accommodate itself to shrinkage or vibration of the building.
—Popular Science Monthly.

Swallowing Exhibit A

In "Anecdotes of Bench and Bar" Mr. A. H. Engelbach tells the following story of an attorney's unfortunate juggling with the evidence:
Peter Burrowes, a well known member of the Irish bar, was on one occasion counsel for the prosecution at an important trial for murder. Burrowes had a severe cold and opened his speech with a box of lozenges in one hand and in the other the small pistol bullet by which the man had met his death. Between the pauses of his address he kept supplying himself with a lozenge. But at last in the middle of a highfaluting period he stopped. His chest heaved; his eyes seemed starting from his head, and in a voice tremulous with fright he exclaimed:
"Oh! Gentlemen! Gentlemen! I've swallowed the bullet!"

Wraps Have Call for Spring Wear

Coat Dresses and Capes Are Among French Fashion Offerings.

In street costumes alone the choice of material and lines is most varied, says a fashion writer in the New York Herald. Starting with the idea of the simple suit and street dress made in rather boylike, or as the French call it "garcon" lines, suits for the street are developed in more elaborate manner or for more formal occasions, running through so many different forms that classification seems impossible.

It may be that later in the season a decided preference for one of the more elaborate types will spring up to alternate with the already established tailored mode. At present time it would be hard to make any positive statement, but the furriers who have banked their judgment on the success of short coats of fur for spring and early summer wear, and foolish as it may seem some of them have, are recklessly running counter to this tide of street costumes and wraps.

Earlier announcements from Paris that many of the spring dresses will have wraps to be worn with them is borne out with each showing on this side as it comes along. Even a blouse costume shown by Patou has its individual coat, a quaint plaited dounce design.

Wraps as Long as Dresses.

Some of the new wraps are as long as the dresses, some of them are short, others three-quarter length. And capes, cape-back dresses and straight scarf-like capes are numerous. The cape, except perhaps for evening, always is short. Fur as trimming seems to be more prevalent in the early models designed in this country than in those shown from Paris, although a few models are collared with light pelts. More enthusiasm apparently is shown for the clipped feather trimmings and the smart scarf models than for fur of any description.

Coat dresses not exactly on the order of those we have known before, but still near enough to coat lines to be so classified, are another type of street costume with which to reckon. Some of these coat dresses might be easier described as suitlike dresses, for a long tunic looks more or less like a jacket and a side closing follows the line of the wrap-around skirt, with the result that the dress looks very like a suit worn buttoned up, although it is in reality in one piece. In a few houses a suit dress is shown with a straight one-piece back and the jacket line in the front simulated by a circular peplum or a straight tucked flounce.

Any complaint that the woman to whom the jeune fille models and the mannish tailored lines are unacceptable may have to forget it with the very first sight of the actual models. Suits, frocks and wraps are shown with sufficient dignity of line to give the really distinctively gowned woman

Charming Dress of Black Satin Gives Somewhat the Effect of a Suit. Scarf Drawn Through Slit at One Side Is of Crepe.

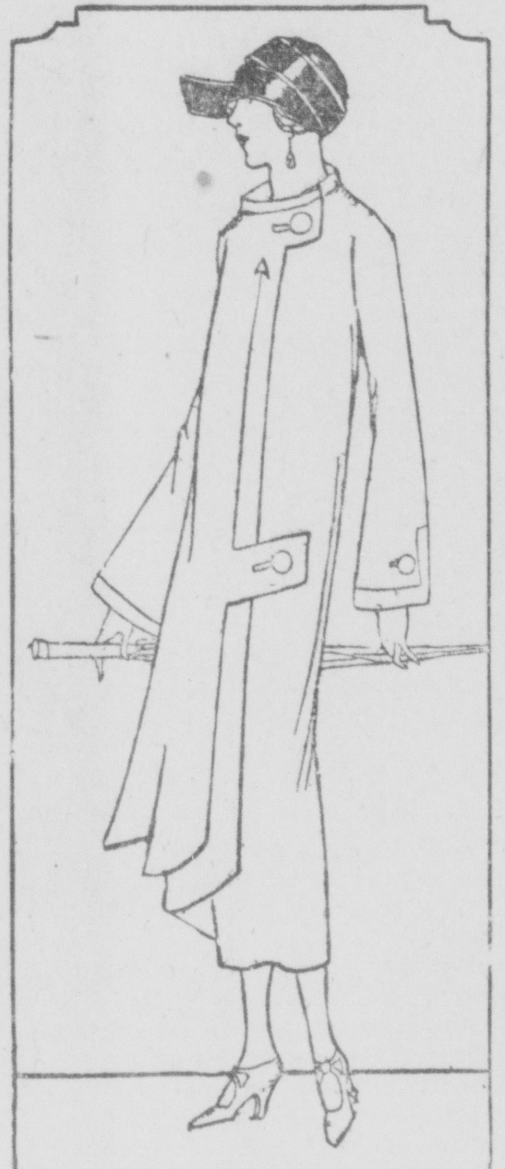

that difference of style that sets her apart from the younger woman, who is rather apt to carry things too far in the matter of wearing the popular thing.

One of the most interesting of the elaborated suits is a study in plaits by the house of Jean Patou. Plaits are a theme in especial favor with this house. Black satin, mirrorlike in its shiny quality, is used, and except for a plain strip at each side and plain sections set in the collar, the entire coat is plaited. It is almost like a suit and plaited skirt, except for the plain under-arm strip, two flounces of the plaiting set on, one above the other, compose the skirt portion of the coat. Plaits which hang from neck to the finger-tip length make the jacketlike upper portion.

The sleeves also are plaited, and, as with the plaits of the rest of the coat, the lower edges hang like a

flounce. In the sleeves the tucks hang loose from the elbow to the wrist, and a second plaited flounce is set aside so that it falls well over the hands. The collar stands double about the throat. This is the coat designed to wear with the blouse of white chiffon One Model Called "Microbe."

A model oddly and humorously called "Microbe" is one by Yteb. It, too, emphasizes two points in the spring models, plaits and wraps to match frocks. Reversing the procedure of the design just described, this model uses the plaiting entirely in the dress, and the trimming on the coat is merely wide bands composed of small interlacing strips. Two bands circle the bottom of the coat, one the sleeves and one the collar. Except for the fact that the coat and frock are in exactly the same shade of toast brown—pale brule, as the French call it—no great stress is laid on similarity, either in the trimming or material. The frock is of georgette, and the coat is

Rather Unusual Is the Gown of Beige Silk Poplin Fashioned With Loose Cut Neck on Chinese Lines and Coat Fastenings.

placed in a more practical class by being featured in kasha cloth. There is a certain expertness in this restraint of a repetition which might make the effect wearisome as well as reveal an amateurishness in the paucity of ideas. The frock is almost sleeveless, and is plaited from the square-cut neck to the low waistline, two flat, loose bands circle the hips, preserving a straight silhouette, which is completed by fine straight plaits below. A very narrow tie girdle is used.

With the first appearance of the black and white theme, a trifle too ardently accepted, the makers are relieving the combination with a touch of color. Drecoll used yellow in combination with black, as well as the white, and Lanvin, with flawless good taste, uses the black and white, but tones it charmingly with a touch of clear blue, or perhaps a little lacquered red. In this collection are seen frocks of white with top coats of black bound with white grosgrain ribbon.

Astonishingly smart is a severe dress for street wear of navy blue rep with a row of buttons trimming the back from the top of the standing collar to the skirt hem. The buttons are placed on a band, evidently to avoid complications with the bottom of the tunic, which is in one piece with the waist, but falls separate each side of the band of buttons from the waistline to below the hips. At the front the tunic appears in the form of an applied peplum each side, but not in the front. A belt extends across this space, with ornaments at each side. No suggestion of a waistline, however, is seen in the back. Sleeves in this dress are tight and long.

Tunic for Street Costumes.

The tunic type of dress will undoubtedly afford inspiration for many costumes for the street. The unbroken line which may be used in this manner at the waist is often of a coatlike aspect. This is seen in a smart dress of satin, with a scarf of the new figured crepe silk winding about the neck and caught through a slit at the front of the dress. A side closing in this design and a peplum, or circular flounce, as the designers prefer to have it called, give the jacket line. The flounce is set on at the waistline in a series of points.

A coat dress of mandarin inspiration has the resemblance to a long coat. The peculiar closing at the neck and the loose straight cut, with regular coat fastening, makes this model particularly severe.

Trimming in most of the models for street wear confines itself to the skillful use of material. Lanvin uses braids and buttons or doted effects in narrow ribbons, which may be of colors contrasting with the shade of the costume.

The inconsequential dresses of light summer silks and crepes are sometimes the most interesting part of the procession of new ideas which are sent from Paris for the warm-weather wardrobe. In these gowns, taken a trifle less seriously than the more formal types of costumes, the designers often try out some of the most novel lines and entertaining oddities.

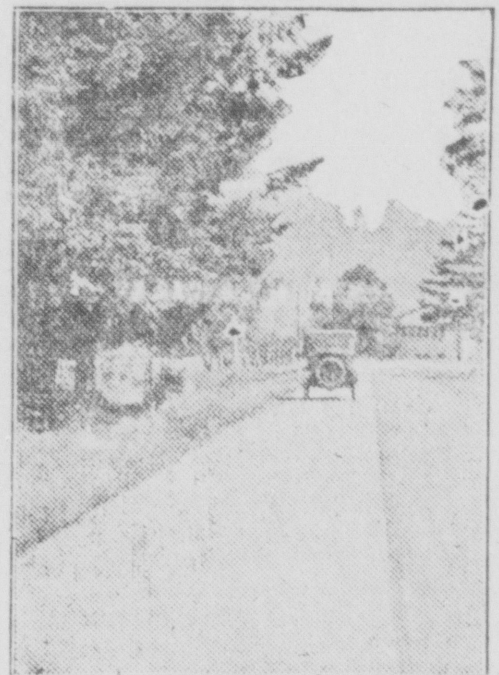

Single Track for Highways Favored

Step Taken for Construction of Permanent and Economical Road System.

Sometimes the financial resources of a community do not permit the construction of the necessary mileage of standard width pavement. To such a community durable construction is as important as it is to communities more favorably situated financially. In fact, limited funds increase the necessity for permanent, economical, maintenance-free highways.

Step Toward Permanent Road.

Some of the communities confronted by this problem have met their needs through the construction of half width, single-track concrete pavements. By this method they have provided a high-class, hard-surfaced road, capable of carrying traffic 365 days of the year. A step has thus been made toward the construction of a

Single Track Concrete Road.

permanent highway system, and every cent used has been invested toward the completion of that system.

When traffic demands it and when additional funds are available, a second trip of single-track road can be placed alongside the first strip. When that time comes the second half of the full width pavement can be laid without interrupting traffic, which will continue to use the first half without interference as before. No detours will be required. In the meantime the single-track roads help the development of the community, cut down transportation costs, reduce maintenance requirements, in short, render the service typical of a concrete road.

Not Good on Through Routes.

On through routes, carrying a heavy volume of traffic, single-track roads are sure to be a disappointment. But on secondary routes and on highways in sparsely settled or undeveloped regions they furnish the means for more intensive development of the community resources and constitute a permanent part of a highway system which will serve its community and state through succeeding generations.

Over 1,200 miles of this type of concrete road had been built in the United States.

Caution Necessary When Making Change to Grass

When spring grass comes there is always a tendency on the part of dairymen to immediately cut down on other feed. Experience, however, would lead us to believe that it is well to make haste slowly in making the change and the best dairymen never cut the grain supply entirely off. Early grass is soft, containing a large amount of water, and a relatively small percentage of milk-producing elements. Even where the pasture is good it is impossible for large producers to do their best and keep up their body condition. It will pay to watch the cows carefully and make the change slowly until the later grass of summer comes on with its greater feeding value. Unless economy in feed is very necessary the feeder can well afford to keep a certain amount of grain in the cow's ration all summer.

Useful Plants Run Wild and Become Grave Pests

There are numerous cases where useful plants have become weeds because they were moved to places where conditions were favorable for their rapid spread and development. Johnson grass is very useful in the South to protect the sides of levees much as quack grass and western wheat grass was formerly used to protect railway embankments. Once introduced into cultivated fields where the roots are widely scattered by machinery, the above useful grasses at once become serious pests. Plants that are apparently innocent are sometimes introduced in trial packages of flower seeds which, if allowed to spread unmolested, soon become a nuisance.

Eradicate Tuberculosis

New Mexico is expecting to find the eradication of tuberculosis from its cattle a comparatively easy and inexpensive task, according to reports made to the United States Department of Agriculture. In the greater part of the state probably no more than one test will be required, as large areas are thought to be practically free of the plague. It is probable that in many of the states of the South and Southwest only a small percentage of the cattle will be found affected with the disease.

FICKARDT'S ROUP AND CHOLERA DROPS

On May 7, 1924, I called on Elmer Doner, Ashville, R. F. D. No. 1, and he told me the following:—

I bought four hundred (400) chicks of a hatchery and while there I bought some tablets to prevent disease or cure them if they were sick. Very soon the chicks began to die. I tried the tablets that I had obtained at the hatchery. I then bought other tablets liquids and powders, all nationally advertised remedies, but none of them did any good and my chicks kept on dying until I had lost 250.

A friend of mine told me of Fickardt's Roup and Cholera drops, at that time I had ten sick chicks in a pen separated from the well stock and I really considered them as good as dead.

I began to use Fickardt's Roup and Cholera drops with all my chicks, both well and sick. Two of the sick ones died, the other eight recovered and I have not lost any others since I began to use Fickardt's Roup and Cholera drops over a month ago.

I would have probably thought that the disease had run its course if it had not been for the fact that these that were sick recovered, but seeing the sick ones get well has convinced me that Fickardt's Roup and Cholera drops cured them.

Americans Are Largest Chair Users of World

Americans are becoming the biggest chair users among nations, says a bulletin of the national foreign trade council.

Like its user, the American chair is constantly on the move, and to make it strong enough to withstand its fidgeting, this chair now passes through 86 operations in its building. More care is taken with it than any other piece of furniture we make.

The chair, commonly regarded as stationary, may travel thousands of miles and meet many adventures in its lifetime, according to the national foreign trade council, which has taken the chair as an astonishing illustration of the international character of trade.

Two chairs that do not travel are St. Peter's chair at Rome, dating from the Sixth century, the most famous of ancient chairs; and the world's largest chair, placed as a monument near the railway station at Gardner, Mass.

The number of old and new chairs in the United States is estimated at upwards of 700,000,000, with three to four million annually manufactured. We are more favored than the European peoples of before the Sixteenth century; until that time chairs were used only by kings or the nobility, and common people stood or sat on the floor.

The ancient chair was built of heavy carved and gilded woods, and covered with costly stuffs. The Egyptian chairs were often made of ebony and ivory. Little used or moved, they lasted.

Taking its average life at ten years, and considering its daily shiftings by a lively people, the travels of the American chair in the home or office have been counted at a minimum of 130 miles. Its movements to other houses or offices, or to other vicinities, add many more miles. The travels of an American rocking chair have been placed at 442 miles. The lazy rocker, however, is passing out of use.

Wood "Wool" House Lining

Household fuel bills can be cut from a quarter to a third, it is claimed, by insulating the walls of the home with a fireproof "wool" made from waste lumber. The material is said to be almost as effective an insulator as pure wool, which, of course, is too costly for building purposes.

The insulator is a flexible blanket made of spruce lumber waste cemented together and packed between two sheets of asphalt-lined, tough waterproof paper. The waste is chemically fireproofed first, and then dried by fans and steam pipes. Next it is ground by machines, cemented, and, after drying, is packed between the paper sheets. The finished product is said to be light, flexible, and easy to apply and to accommodate itself to shrinkage or vibration of the building. —Popular Science Monthly.

Swallowing Exhibit A

In "Anecdotes of Bench and Bar" Mr. A. H. Engelbach tells the following story of an attorney's unfortunate juggling with the evidence:

Peter Burrows, a well known member of the Irish bar, was on one occasion counsel for the prosecution at an important trial for murder. Burrows had a severe cold and opened his speech with a box of lozenges in one hand and in the other the small pistol bullet by which the man had met his death. Between the pauses of his address he kept supplying himself with a lozenge. But at last in the middle of a high-faluting period he stopped. His chest heaved; his eyes seemed starting from his head, and in a voice tremulous with fright he exclaimed: "Oh! Gentlemen! Gentlemen! I've swallowed the bullet!"

Wraps Have Call for Spring Wear

Coat Dresses and Capes Are Among French Fashion Offerings.

In street costumes alone the choice of material and lines is most varied, says a fashion writer in the New York Herald. Starting with the idea of the simple suit and street dress made on rather boylike, or as the French call it "garcon" lines, suits for the street are developed in more elaborate manner or for more formal occasions, running through so many different forms that classification seems impossible.

It may be that later in the season a decided preference for one of the more elaborate types will spring up to alternate with the already established tailored mode. At present time it would be hard to make any positive statement, but the furriers who have banked their judgment on the success of short coats of fur for spring and early summer wear, and foolish as it may seem some of them have, are recklessly running counter to this tide of street costumes and wraps.

Earlier announcements from Paris that many of the spring dresses will have wraps to be worn with them is borne out with each showing on this side as it comes along. Even a blouse costume shown by Patou has its individual coat, a quaint plaited dounce design.

Wraps as Long as Dresses.

Some of the new wraps are as long as the dresses, some of them are short, others three-quarter length. And capes, cape-back dresses and straight skirt-like capes are numerous. The cape, except perhaps for evening, always is short. Fur as trimming seems to be more prevalent in the early models designed in this country than in those shown from Paris, although a few models are collared with light pelts. More enthusiasm apparently is shown for the clipped feather trimmings and the smart scarf models than for fur of any description.

Coat dresses not exactly on the order of those we have known before, but still near enough to coat lines to be so classified, are another type of street costume with which to reckon. Some of these coat dresses might be easier described as suitlike dresses, for a long tunic looks more or less like a jacket and a side closing follows the line of the wrap-around skirt, with the result that the dress looks very like a suit worn buttoned up, although it is in reality in one piece. In a few houses a suit dress is shown with a straight one-piece back and the jacket line in the front simulated by a circular peplum or a straight tucked dounce.

Any complaint that the woman to whom the juvenile flile models and the mannish tailored lines are unacceptable may have to forget it with the very first sight of the actual models. Suits, frocks and wraps are shown with sufficient dignity of line to give the really distinctively gowned woman

Charming Dress of Black Satin Gives Somewhat the Effect of a Suit. Scarf Drawn Through Slit at One Side Is of Crepe.

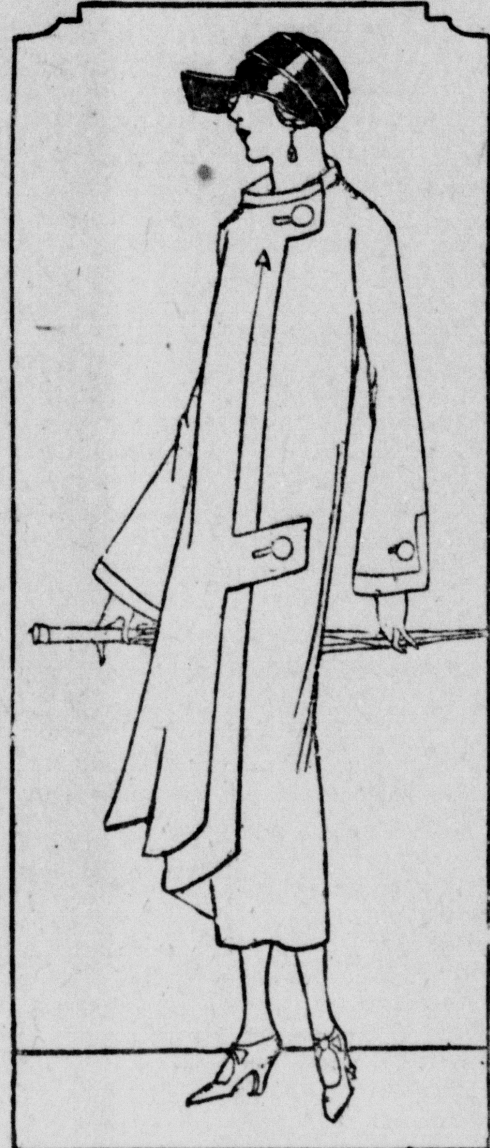

that difference of style that sets her apart from the younger woman, who is rather apt to carry things too far in the matter of wearing the popular thing.

One of the most interesting of the elaborated suits is a study in plaits by the house of Jean Patou. Plaits are a theme in especial favor with this house. Black satin, mirrorlike in its shiny quality, is used, and except for a plain strip at each side and plain sections set in the collar, the entire coat is plaited. It is almost like a suit and plaited skirt, except for the plain under-arm strip, one above the other, compose the skirt portion of the coat. Plaits which hang from neck to the finger-tip length make the jacket-like upper portion.

The sleeves also are plaited, and, as with the plaits of the rest of the coat, the lower edges hang like a

frounce. In the sleeves the tucks hang loose from the elbow to the wrist, and a second plaited frounce is set aside so that it falls well over the hands. The collar stands double about the throat. This is the coat designed to wear with the blouse of white chiffon.

One Model Called "Microbe." A model oddly and humorously called "Microbe" is one by Yteb. It, too, emphasizes two points in the spring models, plaits and wraps to match frocks. Reversing the procedure of the design just described, this model uses the plaiting entirely in the dress, and the trimming on the coat is merely wide bands composed of small interlacing strips. Two bands circle the bottom of the coat, one the sleeves and one the collar. Except for the fact that the coat and frock are in exactly the same shade of toast brown—pale brule, as the French call it—no great stress is laid on similarity, either in the trimming or material. The frock is of georgette, and the coat is

Rather Unusual Is the Gown of Beige Silk Poplin Fashioned With Loose Cut Neck on Chinese Lines and Coat Fastenings.

placed in a more practical class by being featured in kasha cloth. There is a certain expertise in this restraint of a repetition which might make the effect wearisome as well as reveal an amateurishness in the paucity of ideas. The frock is almost sleeveless, and is plaited from the square-cut neck to the low waistline, two flat, loose bands circle the hips, preserving a straight silhouette, which is completed by fine straight plaits below. A very narrow tie girdle is used.

With the first appearance of the black and white theme, a trifle too ardently accepted, the makers are relieving the combination with a touch of color. Drecoll used yellow in combination with black, as well as the white, and Lanvin, with flawless good taste, uses the black and white, but tones it charmingly with a touch of clear blue, or perhaps a little lacquered red. In this collection are seen frocks of white with top coats of black bound with white grosgrain ribbon.

Astonishingly smart is a severe dress for street wear of navy blue rep with a row of buttons trimming the back from the top of the standing collar to the skirt hem. The buttons are placed on a band, evidently to avoid complications with the bottom of the tunic, which is in one piece with the waist, but falls separate each side of the band of buttons from the waistline to below the hips. At the front the tunic appears in the form of an applied peplum each side, but not in the front. A belt extends across this space, with ornaments at each side. No suggestion of a waistline, however, is seen in the back. Sleeves in this dress are tight and long.

Tunic for Street Costumes.

The tunic type of dress will undoubtedly afford inspiration for many costumes for the street. The unbroken line which may be used in this manner at the waist is often of a contlike aspect. This is seen in a smart dress of satin, with a scarf of the new figured crepe silk winding about the neck and caught through a slit at the front of the dress. A side closing in this design and a peplum, or circular dounce, as the designers prefer to have it called, give the jacket line. The dounce is set on at the waistline in a series of points.

A coat dress of mandarin inspiration has the resemblance to a long coat. The peculiar closing at the neck and the loose straight cut, with regular coat fastenings, makes this model particularly severe.

Trimming in most of the models for street wear confines itself to the skillful use of material. Lanvin uses braids and buttons or dired effects in narrow ribbons, which may be of colors contrasting with the shade of the costume.

The inconsequential dresses of light summer silks and crepes are sometimes the most interesting part of the procession of new ideas which are sent from Paris for the warm-weather wardrobe. In these gowns, taken a trifle less seriously than the more formal types of costumes, the designers often try out some of the most novel lines and entertaining oddities.

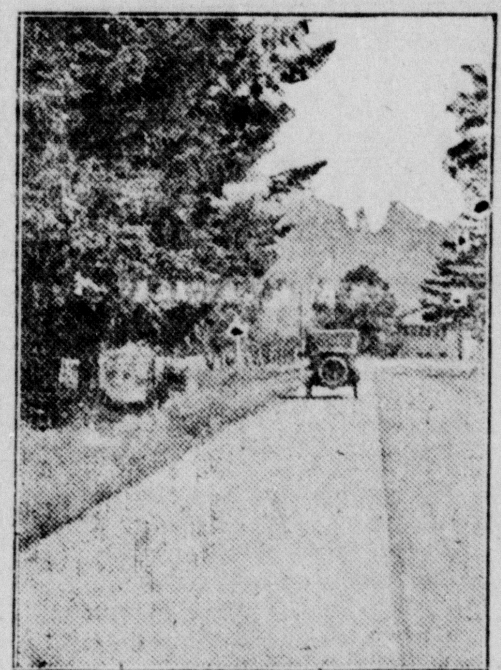

Single Track for Highways Favored

Step Taken for Construction of Permanent and Economical Road System.

Sometimes the financial resources of a community do not permit the construction of the necessary mileage of standard width pavement. To such a community durable construction is as important as it is to communities more favorably situated financially. In fact, limited funds increase the necessity for permanent, economical, maintenance-free highways.

Step Toward Permanent Road.

Some of the communities confronted by this problem have met their needs through the construction of half width, single-track concrete pavements. By this method they have provided a high-class, hard-surfaced road, capable of carrying traffic 365 days of the year. A step has thus been made toward the construction of a

Single Track Concrete Road.

permanent highway system, and every cent used has been invested toward the completion of that system.

When traffic demands it and when additional funds are available, a second trip of single-track road can be placed alongside the first strip. When that time comes the second half of the full width pavement can be laid without interrupting traffic, which will continue to use the first half without interference as before. No detours will be required. In the meantime the single-track roads help the development of the community, cut down transportation costs, reduce maintenance requirements, in short, render the service typical of a concrete road.

Not Good on Through Routes.

On through routes, carrying a heavy volume of traffic, single-track roads are sure to be a disappointment. But on secondary routes and on highways in sparsely settled or undeveloped regions they furnish the means for more intensive development of the community resources and constitute a permanent part of a highway system which will serve its community and state through succeeding generations. Over 1,200 miles of this type of concrete road had been built in the United States.

Caution Necessary When Making Change to Grass

When spring grass comes there is always a tendency on the part of dairymen to immediately cut down on other feed. Experience, however, would lead us to believe that it is well to make haste slowly in making the change and the best dairymen never cut the grain supply entirely off. Early grass is soft, containing a large amount of water, and a relatively small percentage of milk-producing elements. Even where the pasture is good it is impossible for large producers to do their best and keep up their body condition. It will pay to watch the cows carefully and make the change slowly until the later grass of summer comes on with its greater feeding value. Unless economy in feed is very necessary the feeder can well afford to keep a certain amount of grain in the cow's ration all summer.

Useful Plants Run Wild and Become Grave Pests

There are numerous cases where useful plants have become weeds, because they were moved to places where conditions were favorable for their rapid spread and development. Johnson grass is very useful in the South to protect the sides of levees much as quack grass and western wheat grass was formerly used to protect railway embankments. Once introduced into cultivated fields where the roots are widely scattered by machinery, the above useful grasses at once become serious pests. Plants that are apparently innocent are sometimes introduced in trial packages of flower seeds which, if allowed to spread unmolested, soon become a nuisance.

FASHIONS HAVE CHANGED IN VARIOUS WAYS

Here's a picture that tells a complete story in itself. The autocar of 1899 was certainly a snappy thing, featured by the rope tires that were guaranteed not to suffer from puncture. Short wheel base was another bright idea while the motive power was hidden under the seat.

SOFT TIRES ARE VERY EXPENSIVE

Proper Inflation Will Give More Miles and Decrease Gasoline Consumption.

By ERWIN GREER, President Greer College of Automotive Engineering (Chicago).

Tires form a very important part of an automobile, this point being brought to our realization when on a beautiful day for motoring we spend an hour or so struggling on a hot road rectifying the wrongs of a sadly neglected or badly used tire, involving the loss of a perfectly good temper.

Don't drive your car with tires that are soft or not properly inflated or you will be well started on the road to tire trouble with the following results to your tires, and your pocketbook:

Sliding of the tires on the rim when the brakes are applied suddenly, causing the tube to tear around the valve stem.

Tread loosening from the fabric due to arc of bend in transverse-direction or arc of circumference.

Tires puncture much easier when not properly inflated.

Tire heating which destroys the valuable chemical elements necessary to both rubber and fabric.

Cracking of the side walls and rim cutting and in some cases pinching of the tube.

When tires are not properly inflated they create a drag and the car is slow to pick up speed or if on the front wheels steering is made harder. The engine has to work much harder, gasoline consumption is greater and many other effects make themselves known.

Turns Out of Course.

Did you ever drive your car along a smooth road with one of the front tires soft? You noticed the car had a tendency to turn off its course in the direction of the side on which the soft tire was. The cause of that is this:

When a tire becomes soft it decreases the overall diameter of the wheel, that is, if the tire becomes soft enough to allow the axle to settle one-fourth inch on one side, you have in reality a wheel that is one-half inch smaller than the wheel on the opposite end of the axle, therefore the smaller wheel must travel faster or turn a greater number of revolutions to travel the same distance as the other, or leave its true course of direction. The other wheel with the tire properly inflated on the other end of the axle, being larger, travels a greater distance in the same number of revolutions, and if not joined to the car it would follow the smaller wheel off its true course and gradually turn in a circle around the smaller wheel, using the latter for an axis around which to rotate. But both wheels being firmly fastened to the car, they are forced to travel in the true course of the car; thus the smaller wheel (or the one with the soft tire) is forced to travel the same distance as the larger one, thus causing more wear on both.

Keep Well Inflated.

So keep your tires well inflated but not over-inflated as one is as bad as the other. Be sure to keep them inflated to the pressure that is specified on the side of the tire by the manufacturer, and you will get more mileage and decrease gasoline consumption and have a smooth running car with less trouble on the road.

Method for Polishing Dull Metal Fittings

After the car is first brought out of its winter storage, the metal fittings are usually dull and tarnished. They may be restored by the following method: First apply a weak solution of oxalic acid and water to the tarnished surfaces by means of a cloth wrapped around a stick. Any acid accumulations are then loosened and may be cleanly removed by simple wiping. After this ordinary metal polish used for brass work should be applied with a linen cloth and the polishing carried out with soft woolen cloths. If the surfaces are slow to respond to the polishing, try a good carriage maker's polish made as follows: Twenty parts of whiting, one part of soda, one-quarter part of citric acid. This compound is moistened with water for using.

Driving Economies

Well-inflated tires.
Proper carburetor adjustment.
Brakes in correct working order.

All working parts lubricated to assure smooth running.

Disengage clutch whenever possible and coast.

Obtain sufficient momentum when approaching a heavy grade to carry the car a considerable distance up the grade before changing gears.

Compression Important Detail to Keep Eye On

An important detail to watch, and that which keeps the engine running efficiently is compression. An engine with faulty compression may appear to run fairly well when the car is rolling at a reasonable speed or when it is working hard. Lost compression shows up when the car is being driven at comparatively low speed.

Under either of these conditions the engine will run with an irregularity that makes the car jerk or jump instead of running steadily, as it should. This condition indicates that there is considerable loss of power and that much more gasoline is being burned than when the engine is developing its full power.

Thousands of gallons of gasoline are wasted every day by motorists because of the inefficient operation of their engines. In fact, gasoline mileage may be cut in half through compression loss and still the engine may continue to run fairly well, according to the ideas of the amateur driver.

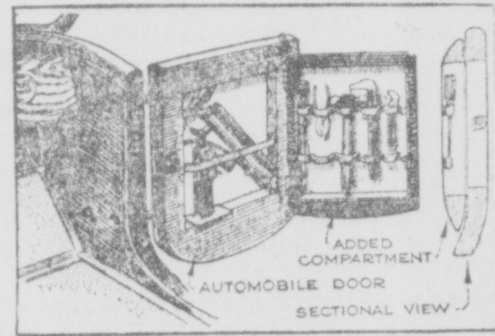

If the engine is not running well and a compression loss is suspected, the easiest way to detect it is to use the crank and turn the engine over by hand, thus feeling the compression in each cylinder. You will nearly always find that some pistons will go over compression much easier than others, and this means that somewhere there is a leak in this cylinder.

The number of miles which a car should run without having the valves reground varies greatly, depending upon oiling and other conditions.

With the average car under normal running conditions it is probably wise to have the valves ground at least once every 5,000 to 7,000 miles, depending upon the running condition of the engine.

Tools Carried in Auto Door Are a Convenience

Vacating the rear seat of an automobile so that tools can be obtained from under it is very inconvenient to the passengers, especially during rainy

A Handy Automobile Tool Kit Incorporated With One of the Front Doors to Save Space.

weather. A solution of this problem is to keep the tool kit elsewhere in the car, as for instance on the front door. The inside covering of the door is first removed and a frame, 2 1/4 inches deep, covered with galvanized iron, is hinged to the door as indicated. The combined width of the door and of the additional compartment furnishes sufficient space for the jack, tire pump and other tools. The tools are held in place by means of leather straps, arranged as shown, and a small catch is used to keep the compartment closed.

Automobile Notes

To keep your storage battery in best shape it should be inspected every two weeks.

At any rate, Jesse James never raised a hood and tightened a spark plug and charged \$3.85.

Don't count too much on the common sense of the other fellow. No one is 100 per cent alert all the time.

COD-LIVER OIL IN EFED

CAUSES FISHY FLAVOR.

Fishy flavored broilers may result from feeding cod-liver oil to the growing chickens, unless it is omitted from the feed for about two weeks before they are slaughtered.

By adding two per cent of cod-liver oil to the feed for young chicks, D. C. Kennard of the Ohio Experiment station has found that broilers can be rapidly and successfully grown in winter. However, if the cod-liver oil is fed up to the time of slaughtering, the broilers will have an objectionable fishy flavor. Mr. Kennard finds that while the cod-liver oil is essential to growth of young chickens in confinement, it may be omitted in finishing them for market.

Many broilers find their way to packing houses when they are "finished off" by feeding in batteries 10 to 14 days before killing and dressing. In this case the finished product will be free from any flavor due to cod-liver oil having previously been fed some of the birds.

"The Store That Treats You Right"

Where Are You Buying Your Garters?

Few stores advertise garters.

They seem to think that supporting a man's hose is too small an item to support a newspaper advertisement.

We're different-- we'd rather have your garter trade than none of your trade at all---and---

It is interesting to note that men who come here for something to hold up their stockings, on looking around are impressed that there is nothing about our Values to hold a man's pocketbook!

Drop in for your next garters---and while you are waiting for your change you may see enough to change your past clothing habits.

LAWN FETE.

The second division of the Ladies' Aid of the Methodist Episcopal church will hold an old-fashioned lawn fete on the lawn of Dr. and Mrs. O. J. Towers, Tuesday evening, June 24. Ice cream, cake and strawberries will be served. In case of rain it will be held in the basement of the church. 20 June 23.

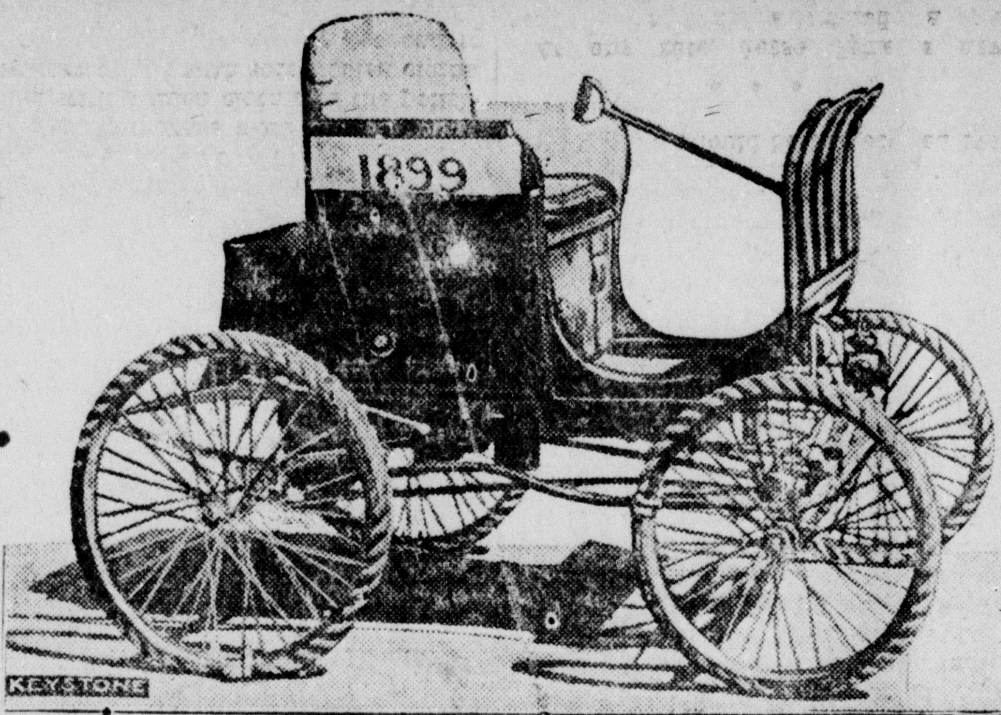

NEWS AGENCY.

Harry R. Gard has the agency for the Cincinnati Enquirer, Ohio State Journal and Columbus Citizen.

SPRING LAMB.

We will have spring lamb again Saturday. 20 June 22. Beck Bros.

FASHIONS HAVE CHANGED IN VARIOUS WAYS

Here's a picture that tells a complete story in itself. The autocar of 1899 was certainly a snappy thing, featured by the rope tires that were guaranteed not to suffer from puncture. Short wheel base was another bright idea while the motive power was hidden under the seat.

SOFT TIRES ARE VERY EXPENSIVE

Proper Inflation Will Give More Miles and Decrease Gasoline Consumption.

By ERWIN GREER, President Greer College of Automotive Engineering, Chicago.

Tires form a very important part of an automobile, this point being brought to our realization when on a beautiful day for motoring we spend an hour or so struggling on a hot road rectifying the wrongs of a sadly neglected or badly used tire, involving the loss of a perfectly good temper.

Don't drive your car with tires that are soft or not properly inflated or you will be well started on the road to tire trouble with the following results to your tires, and your pocketbook:

Sliding of the tires on the rim when the brakes are applied suddenly, causing the tube to tear around the valve stem.

Tread loosening from the fabric due to arc of bend in transverse direction or arc of circumference.

Tires puncture much easier when not properly inflated.

Tire heating which destroys the valuable chemical elements necessary to both rubber and fabric.

Cracking of the side walls and rim cutting and in some cases pinching of the tube.

When tires are not properly inflated they create a drag and the car is slow to pick up speed or if on the front wheels steering is made harder. The engine has to work much harder, gasoline consumption is greater and many other effects make themselves known.

Turns Out of Course.

Did you ever drive your car along a smooth road with one of the front tires soft? You noticed the car had a tendency to turn off its course in the direction of the side on which the soft tire was. The cause of that is this:

When a tire becomes soft it decreases the overall diameter of the wheel, that is, if the tire becomes soft enough to allow the axle to settle one-fourth inch on one side, you have in reality a wheel that is one-half inch smaller than the wheel on the opposite end of the axle, therefore the smaller wheel must travel faster or turn a greater number of revolutions to travel the same distance as the other, or leave its true course of direction. The other wheel with the tire properly inflated on the other end of the axle, being larger, travels a greater distance in the same number of revolutions, and if not joined to the car it would follow the smaller wheel off its true course and gradually turn in a circle around the smaller wheel, using the latter for an axis around which to rotate. But both wheels being firmly fastened to the car, they are forced to travel in the true course of the car; thus the smaller wheel (or the one with the soft tire) is forced to travel the same distance as the larger one, thus causing more wear on both.

Keep Well Inflated.

So keep your tires well inflated but not over-inflated as one is as bad as the other. Be sure to keep them inflated to the pressure that is specified on the side of the tire by the manufacturer, and you will get more mileage and decrease gasoline consumption and have a smooth running car with less trouble on the road.

Method for Polishing Dull Metal Fittings

After the car is first brought out of its winter storage, the metal fittings are usually dull and tarnished. They may be restored by the following method: First apply a weak solution of oxalic acid and water to the tarnished surfaces by means of a cloth wrapped around a stick. Any acid accumulations are then loosened and may be cleanly removed by sample wiping. After this ordinary metal polish used for brass work should be applied with a linen cloth and the polishing carried out with soft woolen cloths. If the surfaces are slow to respond to the polishing, try a good carriage maker's polish made as follows: Twenty parts of whiting, one part of soda, one-quarter part of citric acid. This compound is moistened with water for using.

Driving Economies

Well-inflated tires.
Proper carburetor adjustment.
Brakes in correct working order.

All working parts lubricated to assure smooth running.

Disengage clutch whenever possible and coast.

Obtain sufficient momentum when approaching a heavy grade to carry the car a considerable distance up the grade before changing gears.

Compression Important Detail to Keep Eye On

An important detail to watch, and that which keeps the engine running efficiently is compression. An engine with faulty compression may appear to run fairly well when the car is rolling at a reasonable speed or when it is working hard. Lost compression shows up when the car is being driven at comparatively low speed.

Under either of these conditions the engine will run with an irregularity that makes the car jerk or jump instead of running steadily, as it should. This condition indicates that there is considerable loss of power and that much more gasoline is being burned than when the engine is developing its full power.

Thousands of gallons of gasoline are wasted every day by motorists because of the inefficient operation of their engines. In fact, gasoline mileage may be cut in half through compression loss and still the engine may continue to run fairly well, according to the ideas of the amateur driver.

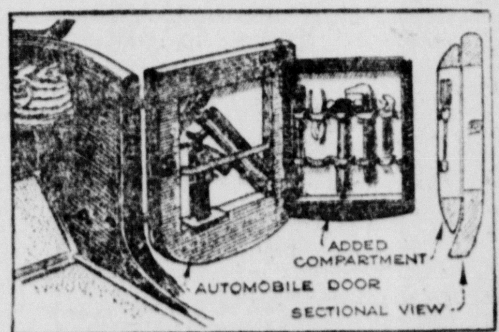

If the engine is not running well and a compression loss is suspected, the easiest way to detect it is to use the crank and turn the engine over by hand, thus feeling the compression in each cylinder. You will nearly always find that some pistons will go over compression much easier than others, and this means that somewhere there is a leak in this cylinder.
